Welcome

Welcome to our school...William Madison Boyd Elementary School was named in honor of the late Dr. William M. Boyd, an African American Educator.

At Boyd we believe strongly in the concept that it takes a village. The faculty, Staff and Administration of Boyd Elementary School are committed to educating all children. We believe in providing a balanced curriculum that enhances academic excellence as well as development of skills needed to become productive citizens in a global world. We believe in educating the whole child and involving parents as partners in schooling.

Vision

We will create a rich environment where students will learn skills necessary to be college/career ready and lifelong learners who will develop their talents, both academically and artistically to become productive community members. Through collaborative planning and professional developments that are researched-based and data driven teachers will help promote student achievement and growth.

Mission

William M. Boyd, a community school where believers achieve and succeed, will ensure that all students promoted from William M. Boyd possess a knowledge-base that will enable them to be successful global citizens and life-long learners. Students will possess the skills necessary to pursue careers that accentuate their talents, as they become productive and responsible members of the world.

About Us

Our Curriculum

WMBES affords all students in pre-kindergarten through fifth grade with a well rounded curriculum that educates the whole child. Teachers implement standards based instruction that provides the foundation for college and career readiness. Students are exposed to lessons that are interrelated across subjects while integrating real-life experiences and technology.

Our Extracurricular Activities

At WMBES we believe in the whole child, so the arts and physical education are essential in the development of our students. Students receive a total of 180 minutes of art, music, physical education, and technology per week.

Our Staff

The staff of WMBES are highly qualified educators who believe in each child's ability and accepts the notion that they are developing tomorrow's leaders.

Our Parents

At WMBES our parents are welcome to participate in various activities that can nurture the academic learning environment of our school. Parents are encouraged to volunteer and support our teachers. We expect all parents to be actively involved in the PTA and various school and parent workshops.

"No Excuses.... All Children Will Learn!!!"
