ATLANTA PUBLIC SCHOOLS

APS Technology Summer Internship

ABOUT THE INTERNSHIP

The Atlanta Public Schools, Accountability and Information Technology Division would like to invite a limited number of motivated high school seniors, college students and recent college graduates to participate in the 2017 Summer Internship Program. The program allows interns a chance to gain insight and hands-on technology experience as they prepare to enter into the workforce.

During the 8-week program, interns will work with various teams to support different technology projects. The program will begin with a one-day orientation. The days to follow, students will continue to receive technical skills and professional development training while working on live projects within supportive team environments. The internship also includes a helpful resume builder workshop as well as practice with public speaking and formal presentations.

DO YOU HAVE WHAT IT TAKES?

ELIGIBILITY

• Be at least 17 years of age by July 1
• Have an interest in Technology or Computer Science
• Be available to participate in all eight (8) weeks of the program
• We encourage eligible APS high school students and alumni to apply
