

The Focus Center Inc. is a 501C3 non-profit organization servicing Atlanta and the surrounding areas that was formed in 2008.

## MISSION

Our mission is to restore a community through training and education. With programs that focus on maintaining social and economic community development. Rebuilding a community that will allow individuals and families to become productive and empowered.

## CHANGING LIVES

For the past few years the Focus Center Inc., has provided basic services and innovative programs that help empower individuals, families, and communities in Metro Atlanta. Partnering with low income housing/apartment complexes, we have serviced over 100 youth and several families in the Atlanta area. Our goal is to increase in the numbers of youth and families we serviced over the past two years. Although we are faced with a poverty stricken community with a growing number of homelessness and high school dropouts, it is our hope to renovate our facility so that we can provide a state of the art center that will meet the needs of the community. We offer youth and family service that include youth workshops and seminars, adult education classes, senior services and small business start- up help.
