

INNOVATION, IMPROVEMENT & REDESIGN

Purpose Statement

The office of Innovation, Improvement & Redesign was created to be the “...architects for us taking APS to the next level...with an army of individuals (stakeholders) whether it's grounded in school turnaround or innovation.... how might we do this (school) differently?” (Dr. Herring, 2022)

The team was created to act as a think tank that ideates together to empower students to become APS creators and problem-solvers. Uplifting the APS-5, the team would like to ignite and redesign the district to be an exemplar of innovation and high performance.

"Healthy interruption & disruption are the core of how we grow."
