

Peyton Forest G.A.T.E Program

Dear Parents and Guardians,

Peyton Forest Elementary remains committed to improving achievement for all students. Class size at our school allows us to provide greater exposure to gifted pedagogy for our high-ability learners. We have identified your child as a high-ability student who may benefit from this exposure in the 2023-24 school year.

This identification means your child will receive appropriate differentiated services. Services may include options such as cluster grouping, personalized learning pathways, and/or enrichment opportunities outside of the school day. This is an innovative model for gifted identified students. This means differentiation services may be provided by your child's homeroom teacher or/and by collaborating with a gifted certified teacher outside of the classroom. This program will benefit all scholars and complement our primary years program as an IB candidate school.

You can stay connected with what is going on in the gifted program with our website. Also, look for communication coming home that will inform you about academic competitions and field trips.

We are excited to give ALL students the opportunity to grow to their full potential. If you have any questions feel free to contact me. See you soon!

Yours In Gifted,

DePaula Woods
