

# MTSS

MTSS (Multi-Tiered System of Supports) is a framework used in education to provide targeted support to students. It integrates academic, behavioral, and social-emotional interventions at varying levels of intensity (tiers) based on student needs. The goal of MTSS is to improve student outcomes through data-driven decision-making and continuous monitoring. It typically involves three tiers:

1. **Tier 1:** Universal support for all students.
2. **Tier 2:** Targeted support for students who need more help.
3. **Tier 3:** Intensive, individualized support for students with significant needs
