

# TREES ATLANTA

Scott Elementary recently joined forces with Trees Atlanta and community volunteers to plant trees on our school grounds. The cloudy weather didn't dampen the excitement of the volunteers who arrived ready to make a difference. Trees Atlanta provided all the necessary tools and trained the volunteers on proper tree planting techniques. Together, they worked to dig holes, plant trees, and cover them with mulch. It was truly heartening to see so many people come together for a common cause.

The trees that were planted at Scott Elementary will assist the environment in a variety of ways, including by promoting clean air, shade, and wildlife habitat. They will also offer our pupils educational resources and opportunity for practical learning about the environment and the significant role that trees play in our world. We are pleased to have contributed to the mission to Trees Atlanta and enhance our environment through the tree-planting project at Scott Elementary, which was both a success and an inspiring experience. We appreciate the efforts of the volunteers and Tree Atlanta for making this initiative a reality.
