

GEMS

Girls Excelling in Math and Science

A partnership between Howard Middle School and Georgia Tech

Founded in 2008, we focus on developing a lifelong love of math and science as well as leadership and community stewardship. Girls will complete weekly STEM activities that are designed and facilitated by a PhD student and professor from Georgia Tech. Activities range from engineering design challenges to cabbage pH sensors to formulating lip balm. Most importantly, we want the girls to enjoy math and science as much as we do!

GEMS is a free club. Attendance is not required, instead participants sign up weekly as they are available. Snacks are provided!

Tuesdays 4:30 – 5:30 PM
Howard MS Art Room
