

Tuesdays 4:30-5:30pm

# GEMS

## GIRLS EXCELLING IN MATH AND SCIENCE

A partnership between Howard Middle School and Georgia Tech.

At GEMS, students will complete weekly STEM activities that are designed and facilitated by a PhD student and professor from Georgia Tech. Activities range from engineering design challenges to cabbage pH sensors to formulating lip balm!

Don't like math? Hate science? Don't worry! At GEMS we use problem solving and team work to complete our projects. We tackle big problems in hands on ways that will get your creativity flowing and your mind working hard without feeling overwhelmed.

**GEMS is a free club. Attendance is not required, instead participants sign up weekly as they are available. Snacks are provided!**

**Contact Haley Carroll at [hcarroll30@gatech.edu](mailto:hcarroll30@gatech.edu) to sign up.**
