# Postsecondary Enrollment Trends

2012 - 2017

Updated February 2018

ATLANTA PUBLIC SCHOOLS  
**DATA + INFORMATION GROUP**  
*We dig data.*

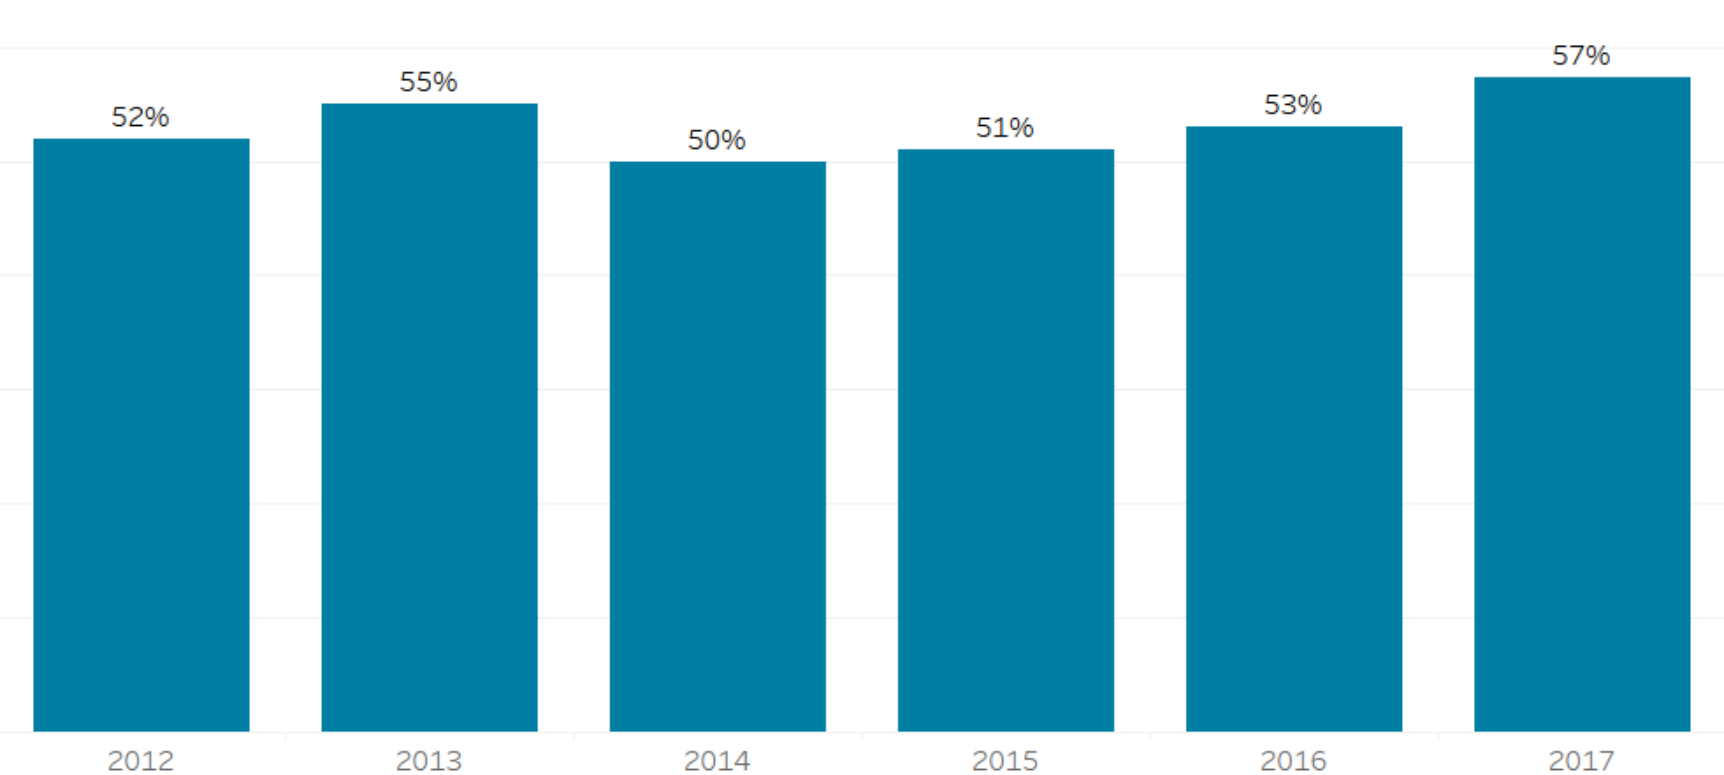

## Introduction

This report looks at college enrollment and persistence of Atlanta Public School (APS) graduates since 2012. It focuses on "seamless enrollment" of each graduating cohort as defined by the Center for Education Policy Research at Harvard University. Seamless enrollment means a student enrolled in a postsecondary institution by October 1<sup>st</sup> following their high school graduation. Information about National Student Clearinghouse, the source of the post-secondary enrollment data, can be found at the end of this report.

Enrollment rates are disaggregated by high school and student demographic groups.

Since 2014, the percentage of on-time APS graduates who seamlessly enrolled in college has continued to increase, climbing four percentage points from 2016 to 2017. Of cohort 2017, 57% of on-time graduates were enrolled in 2- or 4-year institutions as of October 1, 2017. This is compared to a national 2016 enrollment rate of 70%. (Source: [BLS](#))

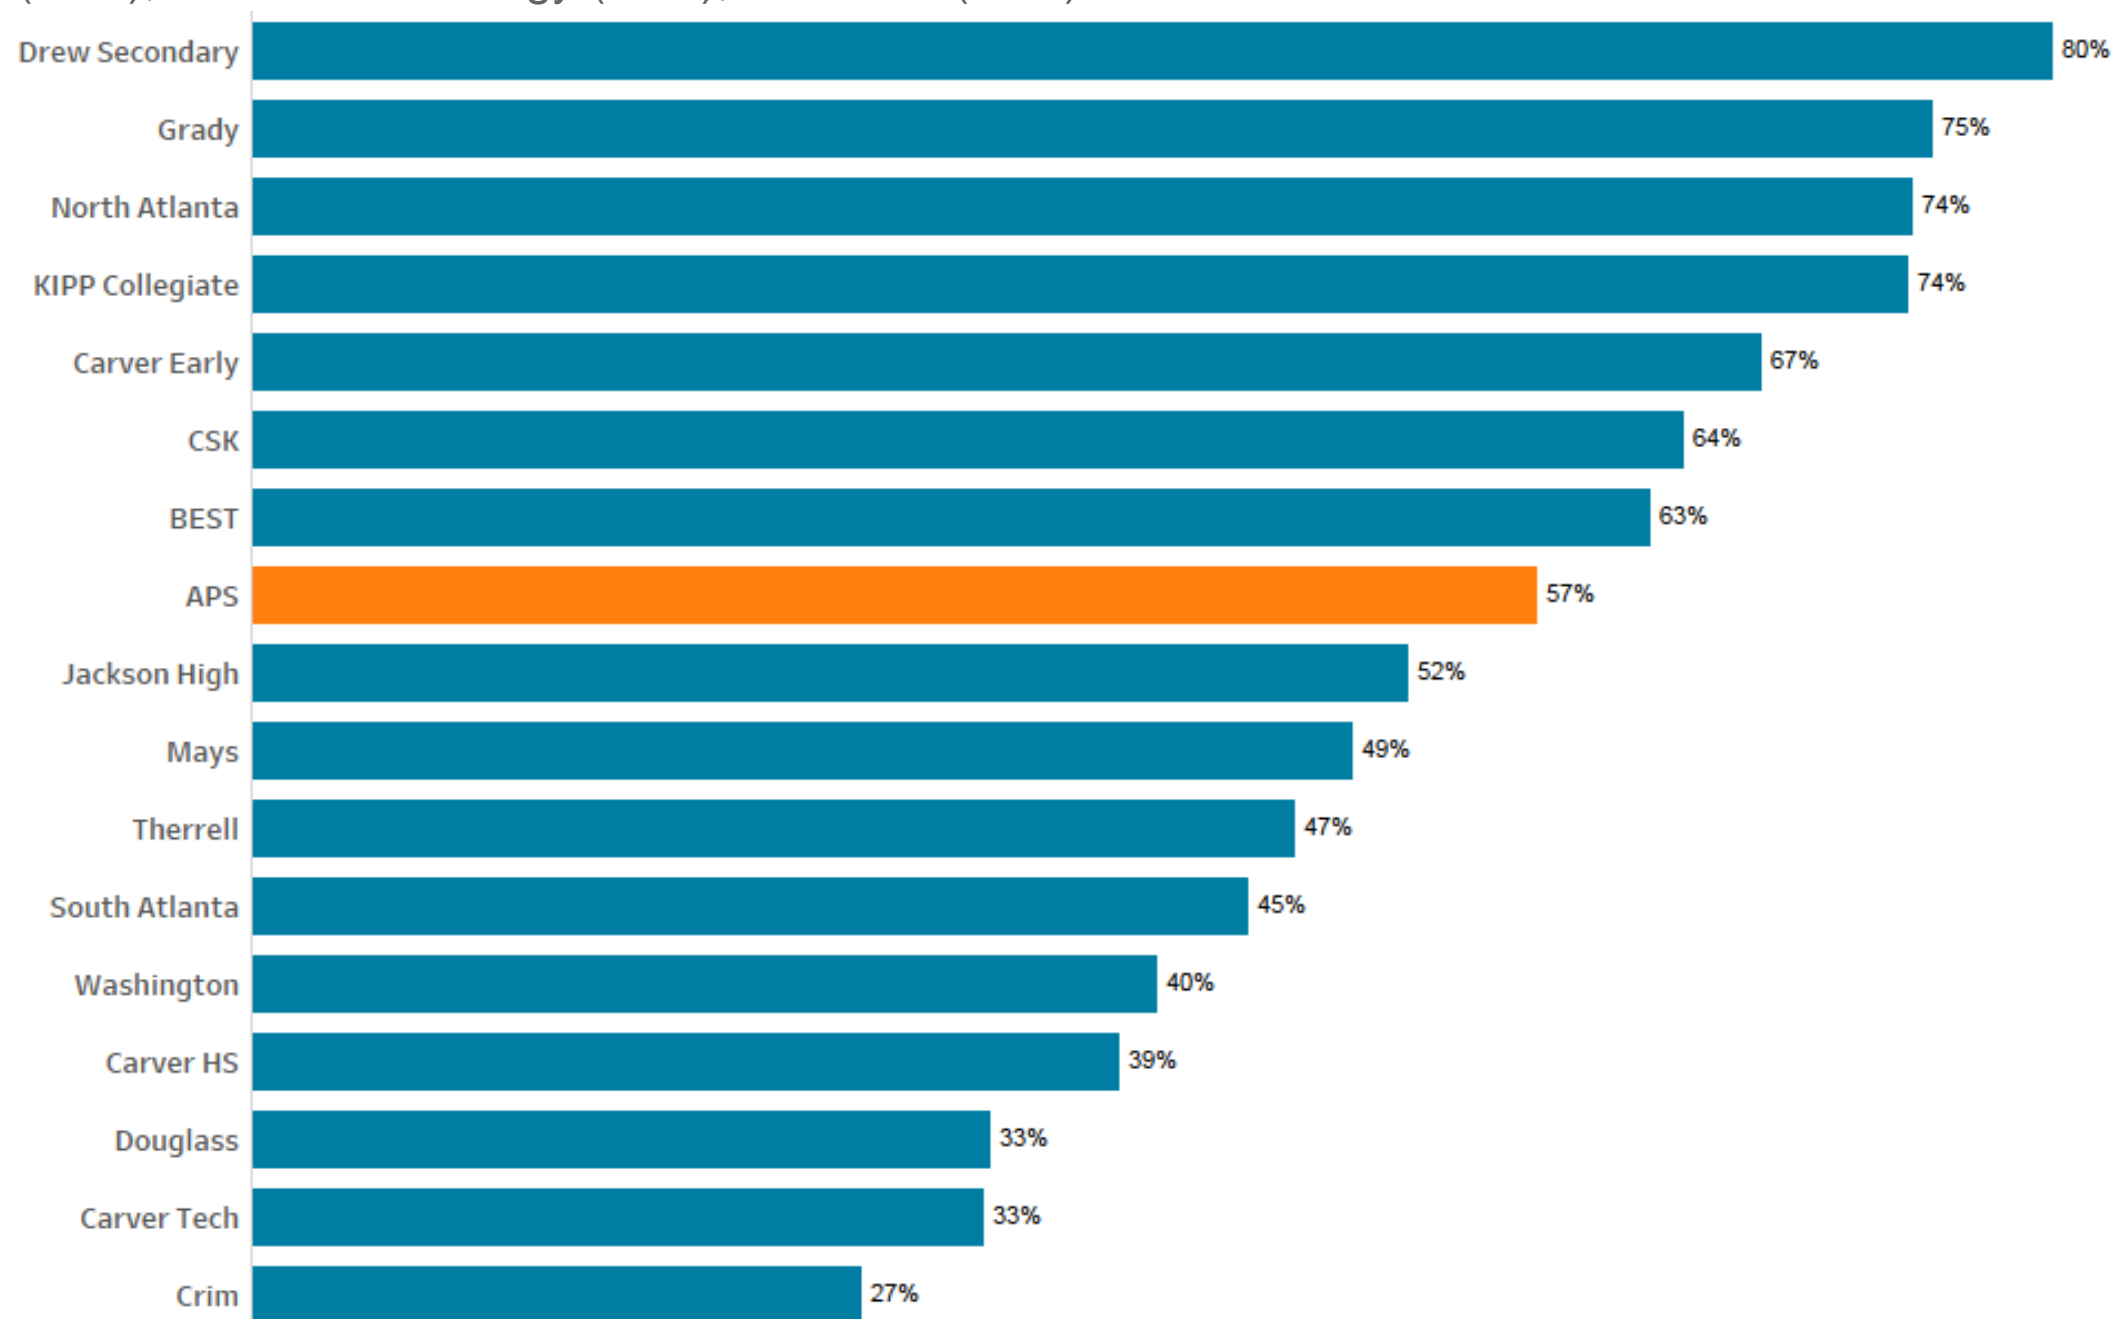

APS Seamless Enrollment by Cohort

*Note: Albany State University was delayed in submitting fall 2017 enrollment data; data will be available from the National Student Clearinghouse in April 2018. According to partner data, at least 50 APS cohort 2017 students enrolled at ASU. Adding these enrollments will increase the cohort 2017 seamless enrollment rate by about 2 percentage points.*

## 2017 postsecondary enrollment rates varied by high school

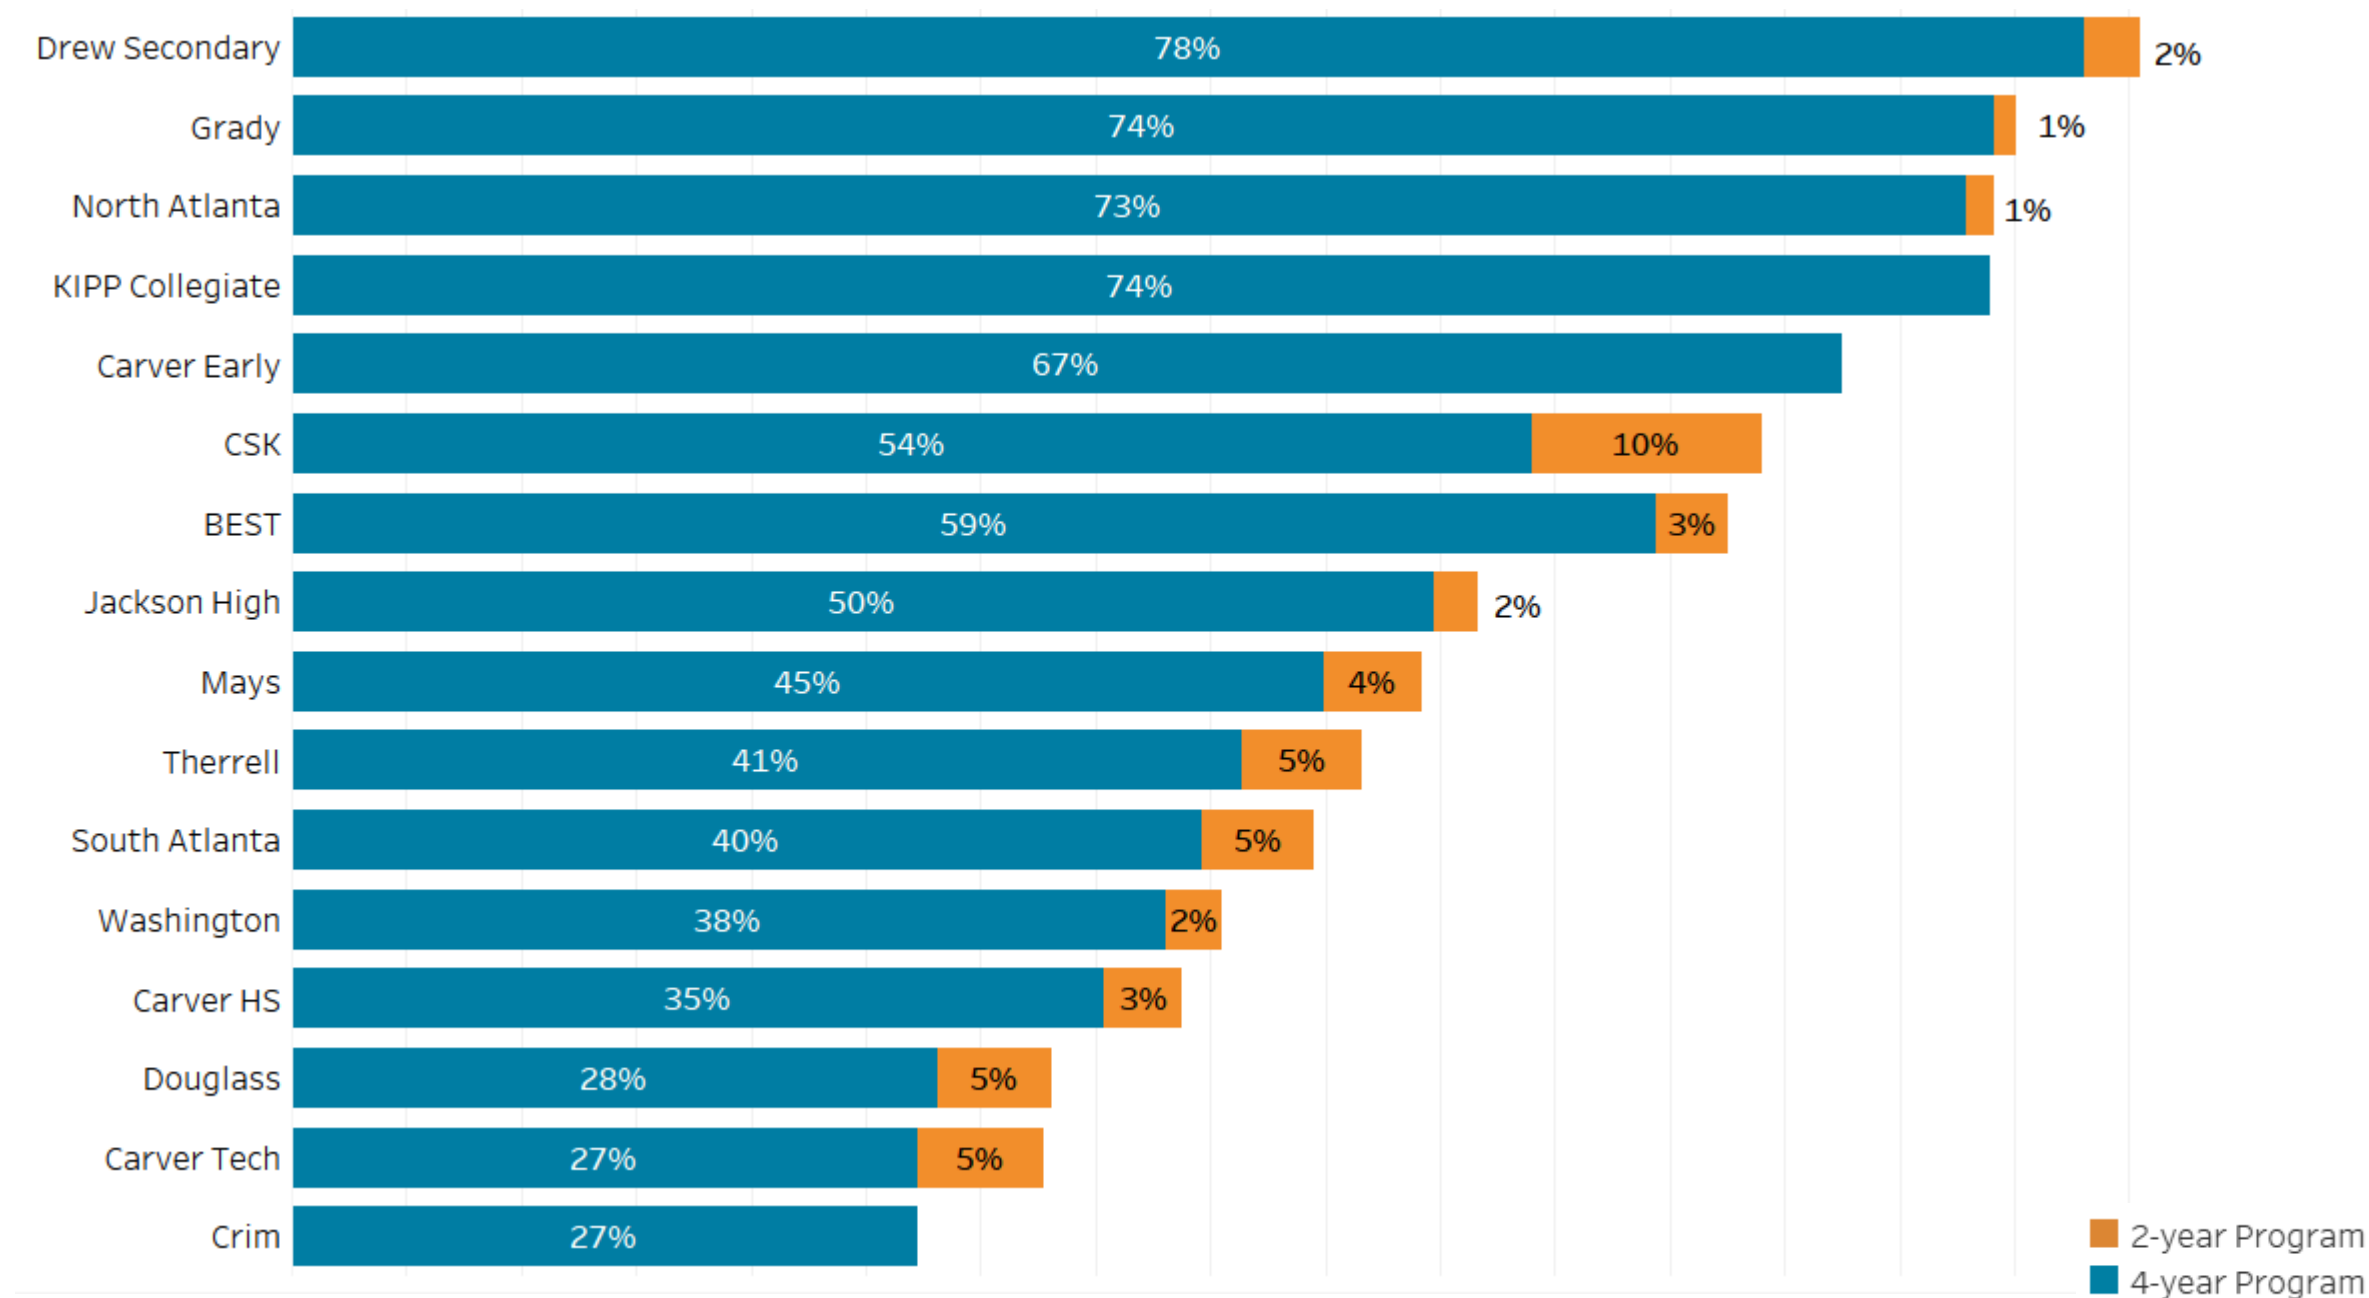

In 2017, there were substantial differences across high schools in seamless college enrollment rates. Drew Secondary had the highest enrollment rate (80%), followed by Grady (75%), KIPP Collegiate (74%), and North Atlanta (74%). Douglass (33%), Carver Technology (33%), and Crim (27%) had the lowest rates.

*Note: According to partner data, Douglass, Mays, Jackson, Washington, KIPP, Carver HS, CSK, and Carver Early had at least 3 cohort 2017 graduates enrolled at Albany State.*

## The majority of 2017 seamless college enrollees went to four-year colleges

Districtwide, only 3% of cohort 2017 graduates enrolled in two-year programs compared to 55% in four-year programs. Across most schools, the percentage of graduates enrolling in two-year programs ranged from 0% to 5%; at CSK, 10% of graduates enrolled in two-year programs.

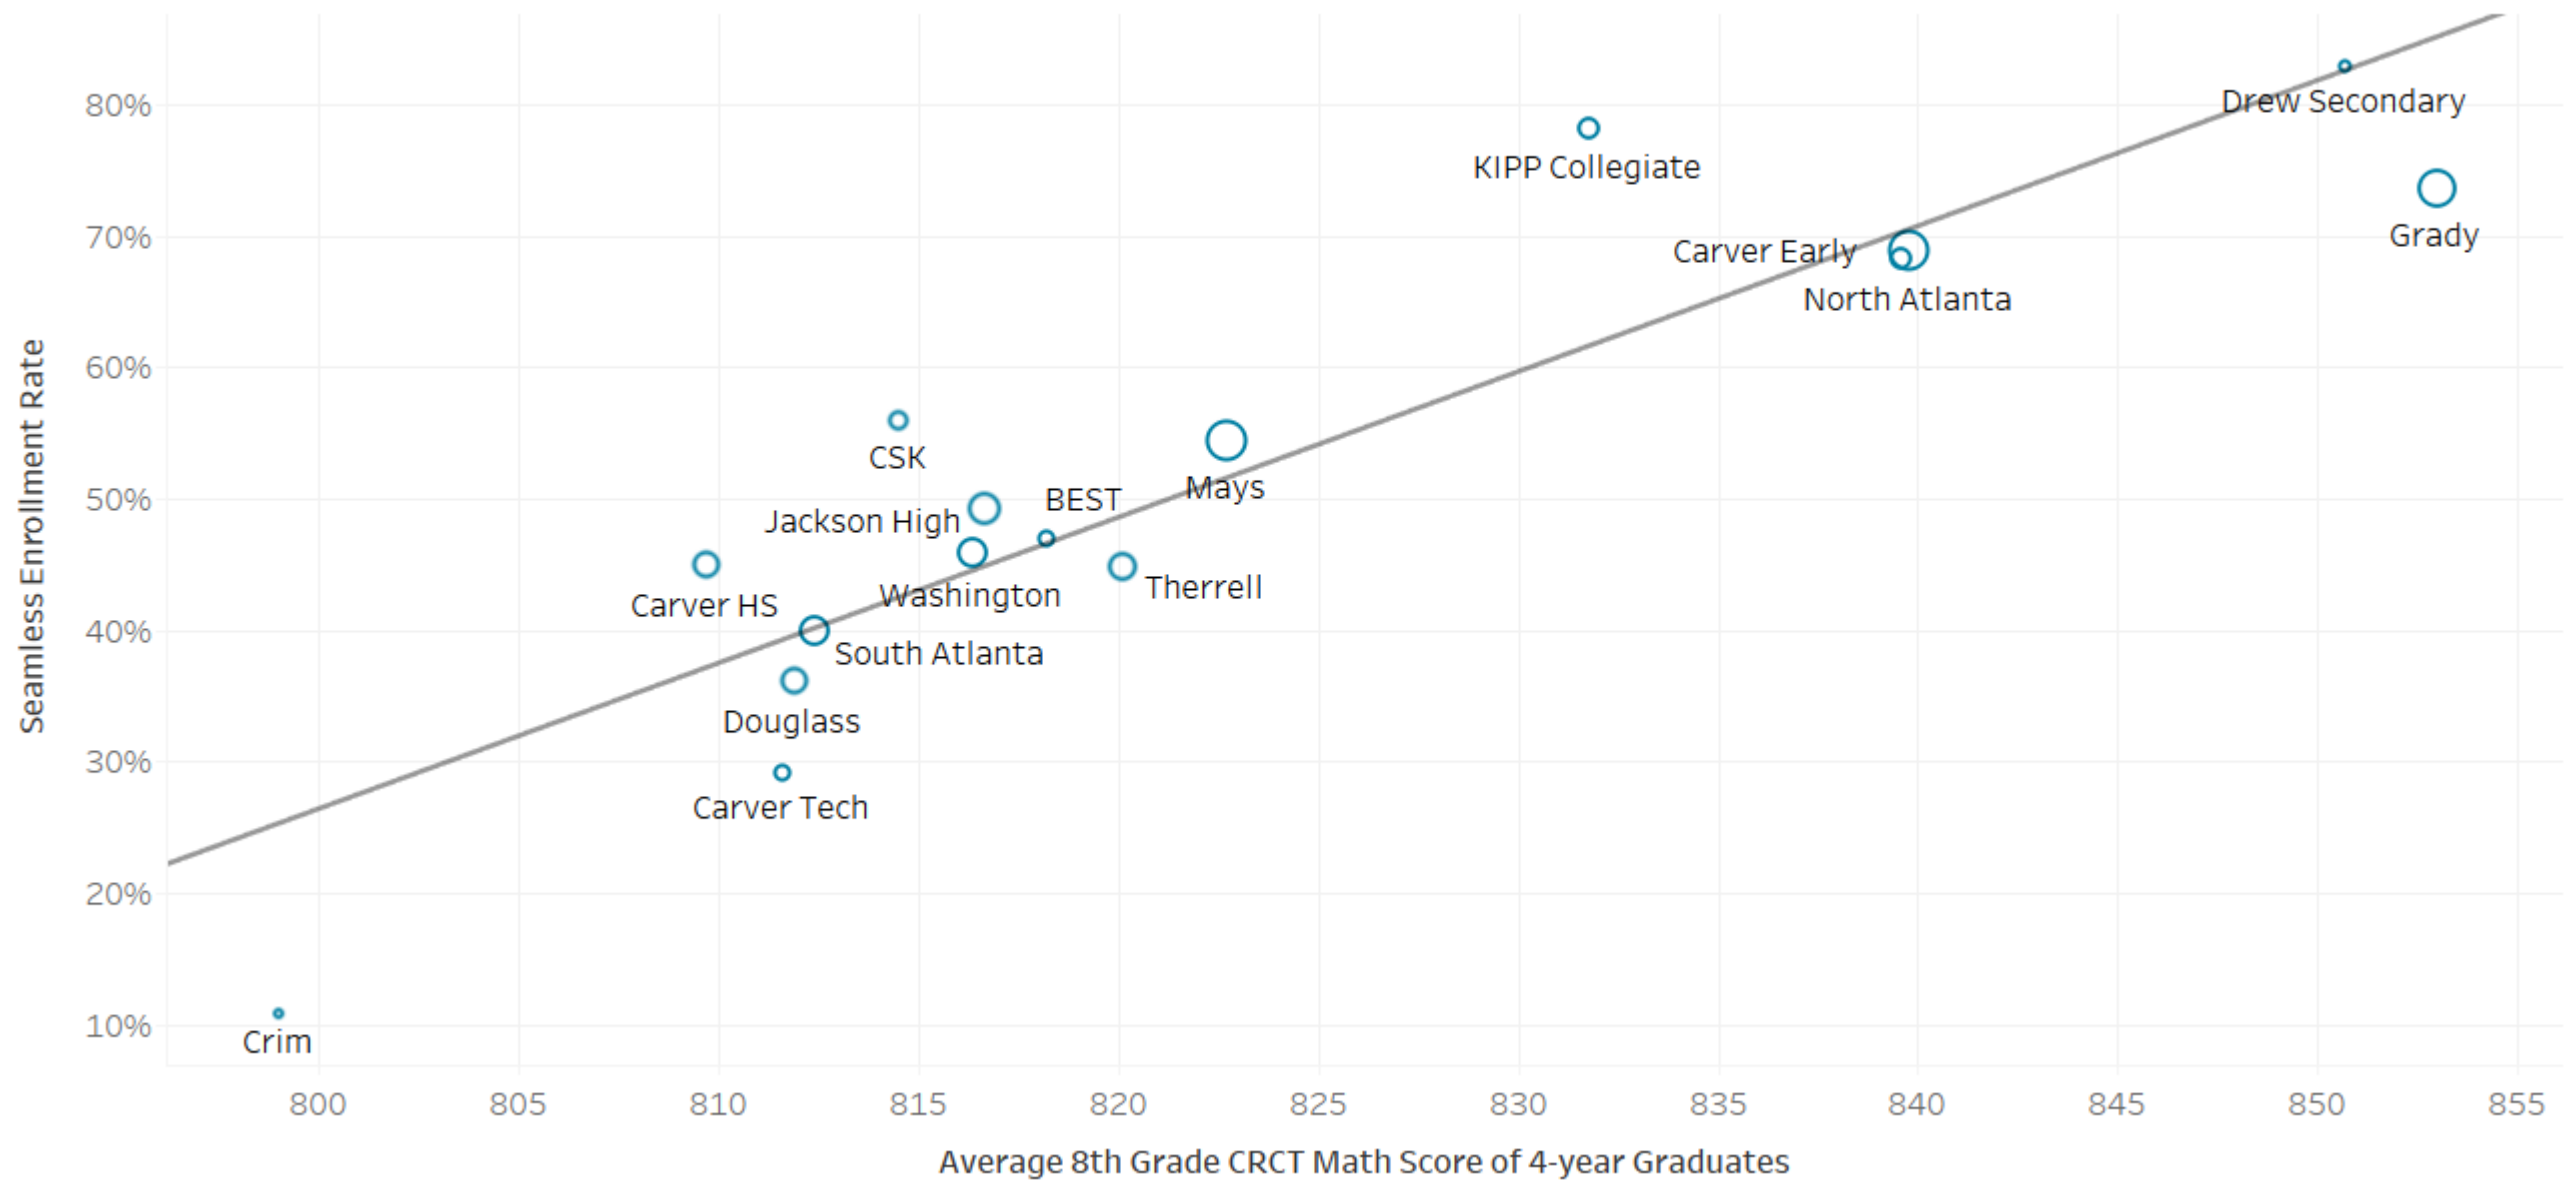

Note: College classification comes from the National Student Clearinghouse Student Tracker report. The NSC classifies GSU-Perimeter and Atlanta Metropolitan State College as 4-year schools.

# High schools receiving students with higher academic achievement have higher seamless college enrollment rates

There is a relationship between 8<sup>th</sup> grade CRCT performance and seamless college enrollment. KIPP Collegiate, CSK and Carver HS enroll students in college at higher rates than expected based on their 8<sup>th</sup> grade CRCT scores. Grady, Crim, Douglass, and Carver Tech enroll students at lower rates than expected.

Seamless Enrollment and 8th Grade CRCT Math Scores, Cohort 2014-2017 Graduates

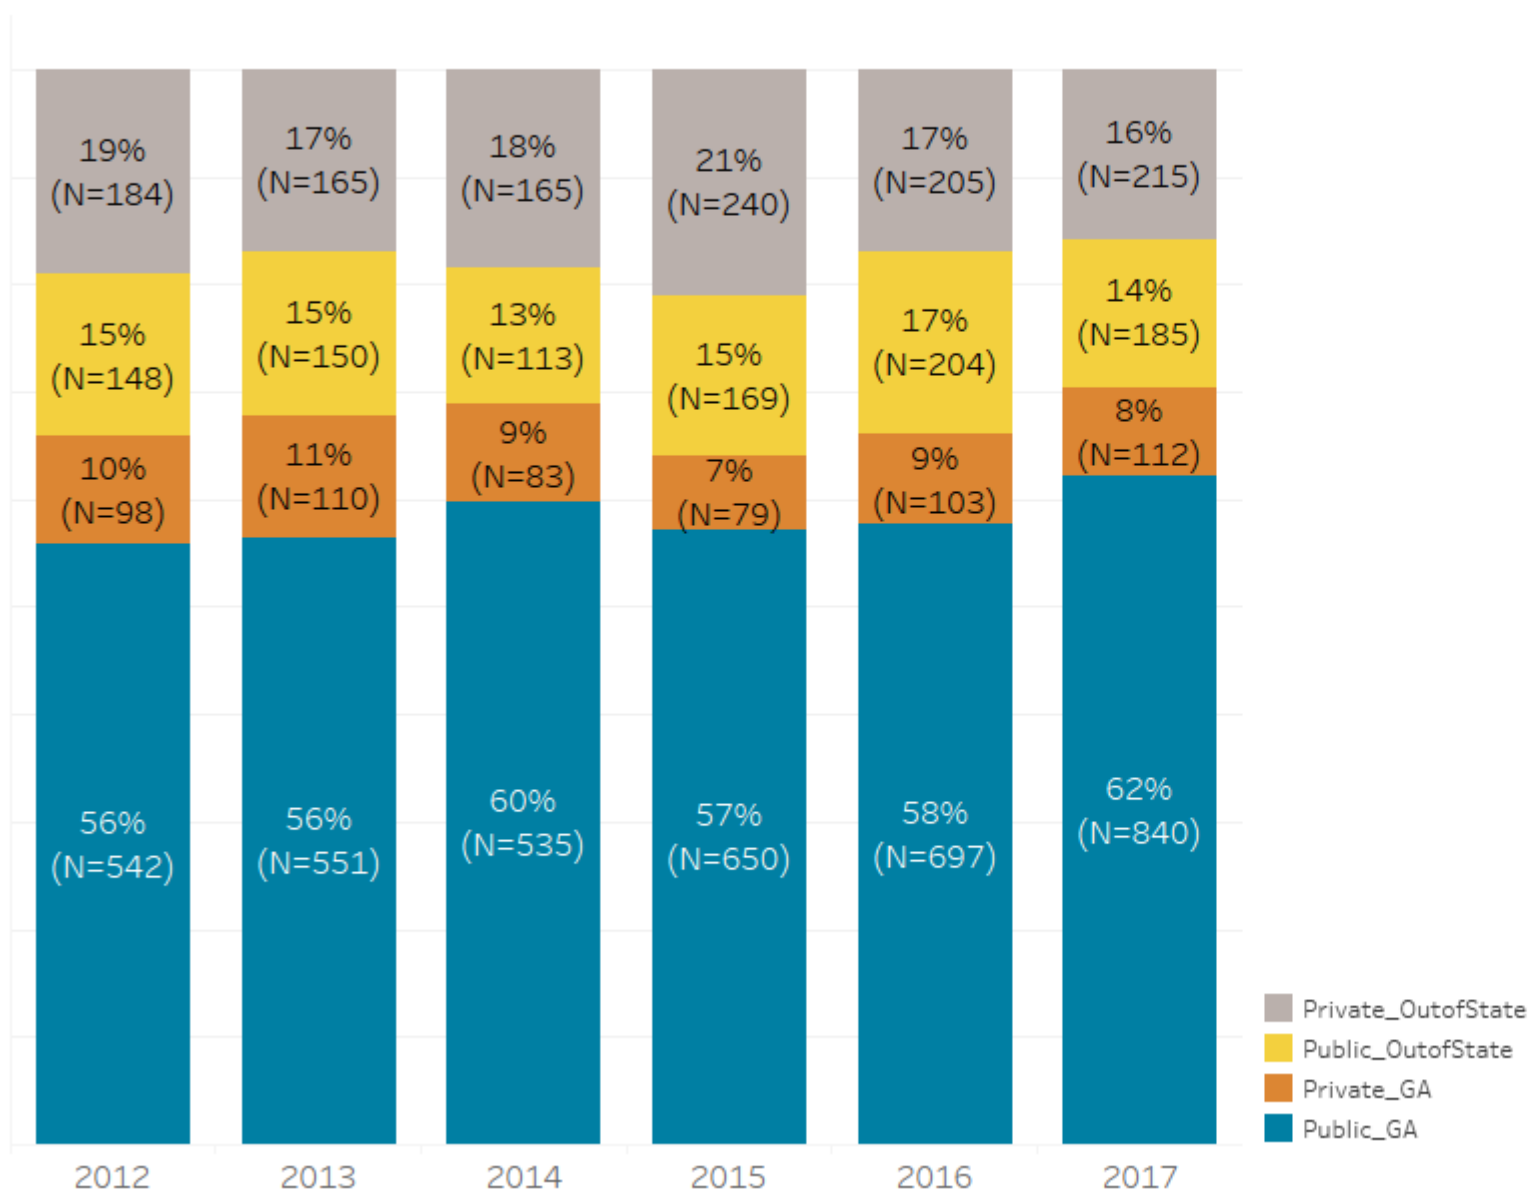

\*KIPP Collegiate’s figures do not include cohort 2014; Drew Secondary’s figures only include cohort 2017  
Note: The CRCT assessments were retired after the 2013-14 school year; cohort 2017 was one of the last to complete 8<sup>th</sup> grade CRCT testing.

## The majority of APS college enrollees attend public institutions within Georgia

Since 2012, more than half of all seamless college enrollees from APS enrolled at in-state public institutions. From 2016 to 2017, the percentage of students enrolling at public in-state institutions increased by four percentage points, while the percentage of students enrolling at public institutions in other states decreased. For the third year in a row, Georgia State University enrolled more APS graduates than any other post-secondary institution.

## Postsecondary enrollment rates vary across student racial/ethnic groups

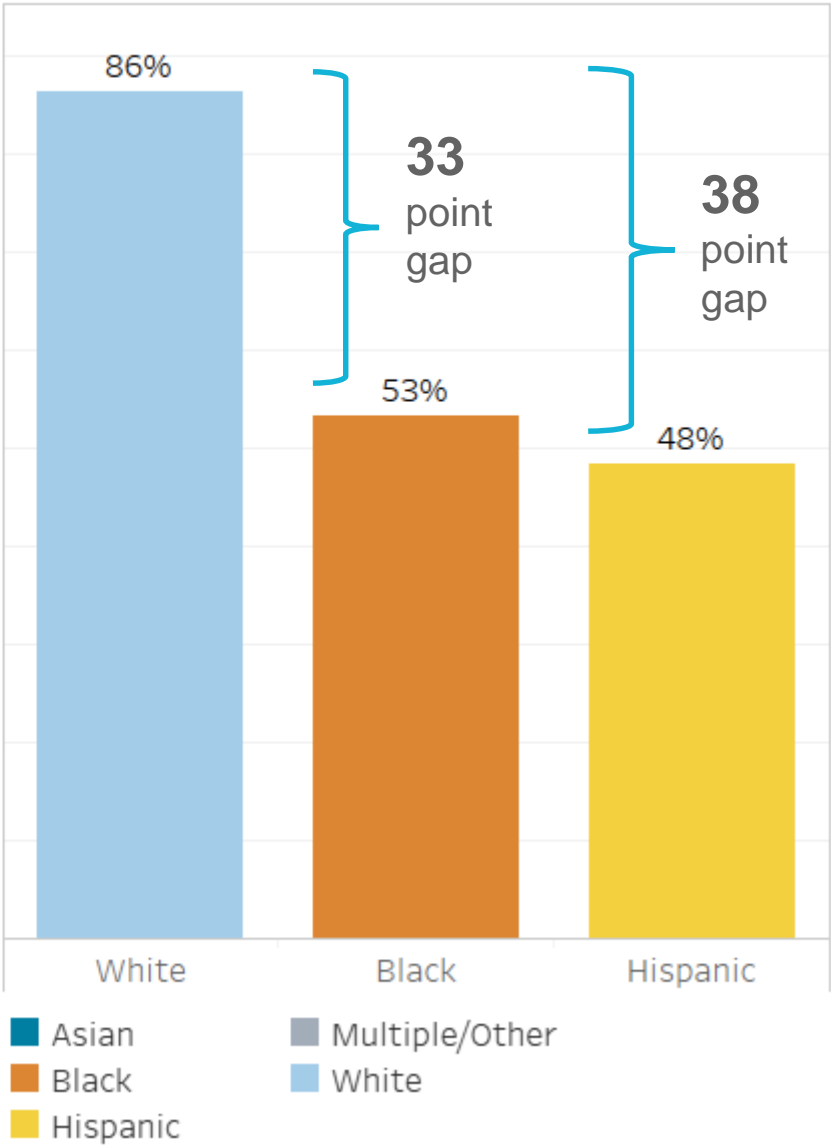

All racial subgroups enrolled in college at higher rates in 2017 than in 2016. The increase was especially pronounced for Hispanic students.

APS white and Asian students enroll in college at a higher rate than Hispanic and black students. In 2017, the black/white enrollment gap was 33 percentage points and the Hispanic/white enrollment gap was 38 percentage points.

## The percentage of APS graduates seamlessly enrolling has continued to increase

While the percentage of APS graduates seamlessly enrolling has increased over the past four years, the proportion who remain enrolled in subsequent years has remained relatively constant (about 40% of graduates persisting to year 2).

For this analysis, college persistence is defined as remaining enrolled in a post-secondary institution as of October 1 in years following initial enrollment. A student need not remain enrolled in the same institution to count as persisting; however, s/he must remain enrolled continuously (as of October 1 in consecutive years).

Seamless College Enrollment and Persistence of APS On-Time Graduates

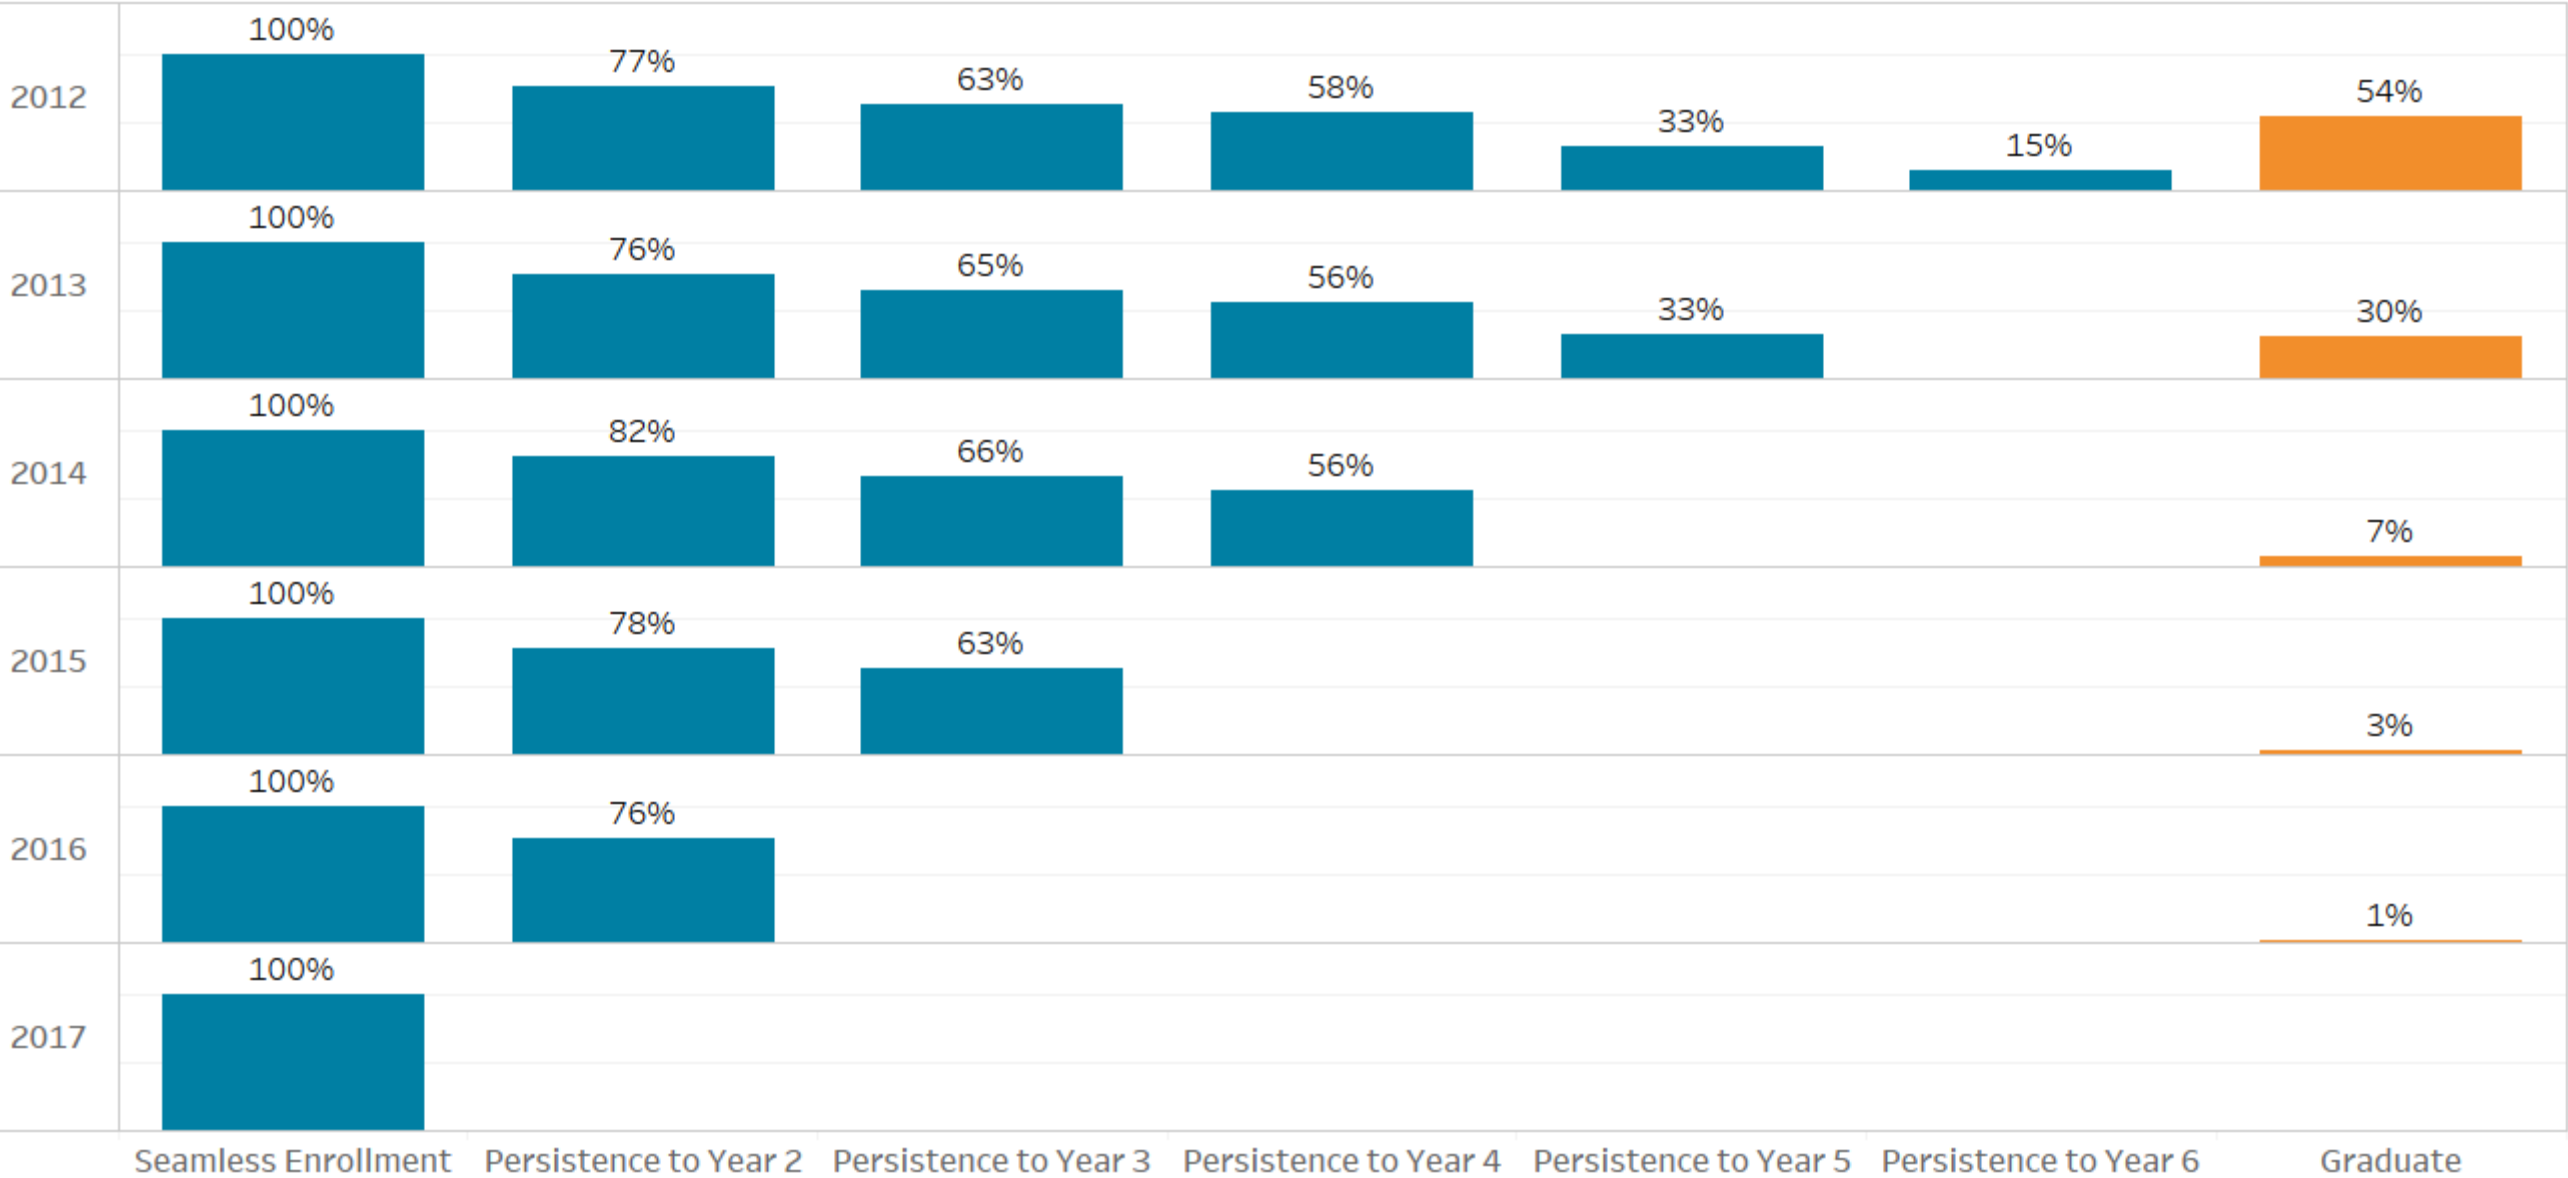

# More than half of APS cohort 2012 graduates who seamlessly enrolled in 2- or 4-year colleges earned degrees within 6 years

National measures of persistence and college graduation rates typically consider the percentage of *enrollees* who persist and graduate. Of APS students who seamlessly enroll in college, about three of four persist to year 2.

Nationally, the 6-year graduation rate is 59% for 4-year colleges (the 3 year graduation rate for 2-year colleges is 29%). (Source: [NCES](#))

Persistence of APS Seamless Enrollees

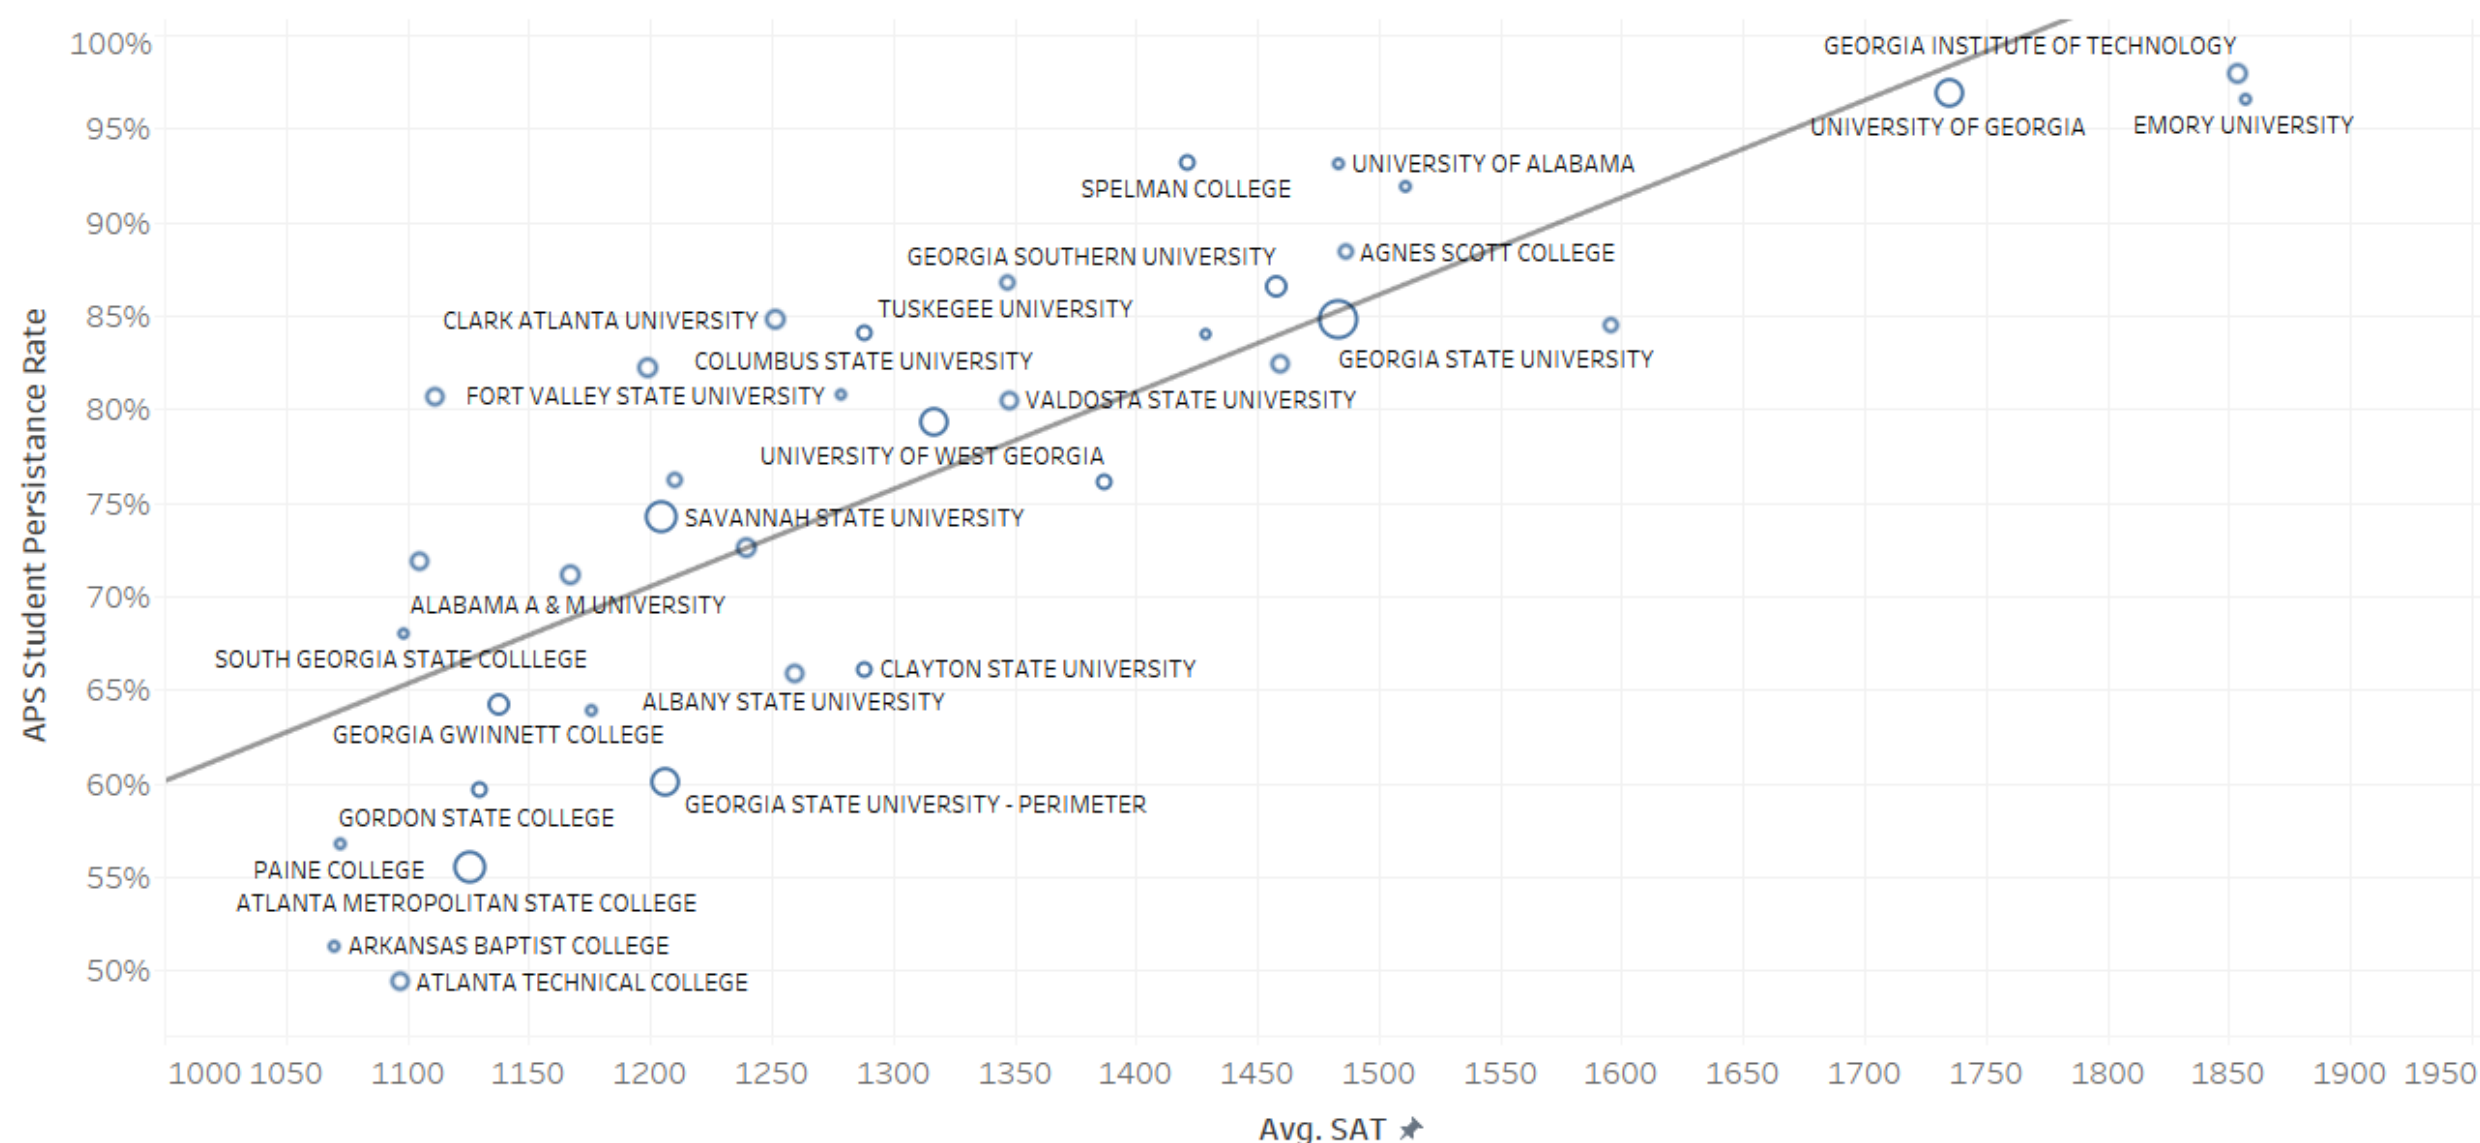

## Persistence rates of APS students vary by postsecondary institution

APS students who attend schools with more rigorous admissions criteria tend to remain enrolled at post-secondary institutions at higher rates. Students who enroll at colleges admitting APS students with lower SAT scores persist to year two at more variable rates. APS students at several HBCUs, including Howard, Spelman, Clark Atlanta, and Tuskegee persist to year two at higher rates than other schools admitting APS students with similar SAT scores.

SAT scores come from College Board data files and may not include all APS students at a given institution.

APS Persistence to Year Two and Average SAT Scores by First Enrolled College, Cohorts 2012-2016

Notes: The SAT changed format in March 2016; students in cohort 2016 were among the last to take the 2400-point test.  
Albany State was delayed in submitting fall 2017 enrollment data, which affects their persistence rate.

## A number of APS students attend postsecondary institutions with low graduation rates

While we do not have enough years of data to make conclusions about the graduation rates of APS students at specific institutions, the National Center for Education Statistics publishes institutional graduation rates. The schools included in this table enrolled at least 15 APS students from cohorts 2012-2017 and have graduation rates lower than the national average (about 45%).

Graduation rates come from the Department of Education's [College Scorecards](#) and are the percent of students who enrolled in the fall as first-time, full-time students and completed within 150 percent of the expected time. To reduce variability from year to year, graduation rates are averaged across years.

## Data Sources

### National Student Clearinghouse

Postsecondary enrollment rates are calculated using data provided by the National Student Clearinghouse (NSC). NSC is a subscription service used by APS to match graduates with college enrollment records. NSC obtains student data directly from participating college and university registrars typically on a monthly basis. NSC claims that more than 96 percent of all students enrolled in degree granting institutions in the U.S. are attending schools that regularly send their data to NSC. Known postsecondary institutions enrolling APS students that do not participate with NSC include Keiser University-Ft Lauderdale (FL), Toccoa Falls College (GA), and University of Notre Dame (IN). The U.S. service academies (Military Academy, Naval Academy, etc.) do not submit data to the NSC.

Additionally, there are several limitations to matching and reporting of enrollment data which may result in underreporting of college enrollment. Limitations such as name variations, name changes, and FERPA blocks may result in lower levels of matching. According to NSC, Georgia has a [FERPA block rate](#) of about 1.3%.

### SAT

APS SAT scores came from district-level score reports received from College Board. Scores are matched back to APS students using name, date of birth and Social Security numbers.

### National College Enrollment

National 2016 college enrollment rates come from the [Bureau of Labor Statistics](#).

### College Graduation Rates

College graduation rates come from the Department of Education's [College Scorecards](#).
