Atlanta Public Schools

Postsecondary Enrollment Trends

2012 - 2023

ATLANTA PUBLIC SCHOOLS
DATA + INFORMATION GROUP
*We dig data.*

Introduction

This report examines college enrollment and persistence of Atlanta Public School (APS) graduates since 2012. It focuses on "seamless enrollment" of each graduating cohort as defined by the Center for Education Policy Research at Harvard University. Seamless enrollment means a student enrolled in a postsecondary institution by October 1st following their high school graduation. Enrolled students who disenroll before October 1st are not counted as seamless enrollees. Seamless enrollment encompasses both full-time and part-time enrollment. Information about National Student Clearinghouse (NSC), the source of the postsecondary enrollment data, can be found at the end of this report. Fifty-eight percent of cohort 2023 on-time graduates were enrolled in 2- or 4-year institutions as of October 1, 2023.

Atlanta Public Schools Seamless Enrollment among On-Time High School Graduates by Cohort

Note. On-time graduates refers to students who graduate in four years with a regular high school diploma as reported by the Georgia Department of Education. Seamless enrollment rates for cohorts prior to 2023 were not updated in this graph and use the rate from the initial calculation; for example, the seamless enrollment rate for cohort 2022 was 55% when initially calculated in 2023.. All subsequent analyses were conducted using the cohort 2023 data file. Percentages were rounded to the nearest whole number.

2023 postsecondary enrollment rates varied by high school

In 2023, there were substantial differences across high schools in seamless postsecondary enrollment rates. Classical had the highest seamless enrollment rate (86%), followed by Drew Secondary (79%), and Midtown (77%). Douglass (26%), Carver STEAM (30%), and BEST (40%) had the lowest seamless enrollment rates.

Seamless Enrollment by High School, Cohort 2023

| School	Rate
Classical	84% (26 / 31)
Drew Secondary	79% (97 / 123)
Midtown	77% (290 / 376)
North Atlanta	74% (409 / 551)
KIPP Collegiate	72% (125 / 173)
CSK	65% (17 / 26)
Carver Early	58% (63 / 108)
APS	58% (1,626 / 2,812)
Jackson High	56% (173 / 311)
Mays	44% (118 / 266)
Washington	42% (63 / 151)
Therrell	42% (78 / 187)
South Atlanta	41% (79 / 193)
BEST	40% (12 / 30)
Carver STEAM	30% (27 / 91)
Douglass	26% (49 / 192)

Note. The denominator in the parentheses is the number of on-time graduates and the numerator is the number of seamless enrollees. Percentages were rounded to the nearest whole n

The majority of 2023 seamless college enrollees went to four-year colleges

Districtwide, about 13% of cohort 2023 graduates enrolled at institutions that predominantly grant 2-year degrees, compared to 45% enrolling at institutions that predominantly grant 4-year degrees. The proportion of graduates enrolling in 2-year institutions varies widely by high school. Classical had the highest proportion of its cohort 2023 on-time graduates that seamlessly enrolled in 4-year institutions. Carver Early College had the highest proportion of its on-time graduates that seamlessly enrolled in 2-year institutions.

Seamless Enrollment by High School and Institution Type, Cohort 2023

| High School	Seamless 4-year	Seamless 2-year
Classical	84%	
Drew Secondary	71%	8%
Midtown	69%	9%
North Atlanta	66%	8%
KIPP Collegiate	51%	21%
CSK	42%	23%
Carver Early	32%	26%
APS	45%	13%
Jackson High	40%	15%
Mays	31%	14%
Washington	27%	15%
Therrell	25%	17%
South Atlanta	26%	15%
BEST	27%	13%
Carver STEAM	19%	11%
Douglass	15%	10%

Notes. College classification uses U.S. Department of Education College Scorecard data (predominant degree type). The "2-year" classification includes any institutions that predominantly grant certificates or associate degrees. Due to rounding, the two percentages listed for the district and each school might not sum to the percentage listed in the previous slide.

The majority of APS seamless college enrollees attend public institutions within Georgia

Since 2017, more than half of all seamless college enrollees from APS enrolled within in-state public institutions. The percentage of students enrolling at public out-of-state institutions decreased slightly compared to last year, while the percentage of students enrolling at public in-state institutions increased. More cohort 2023 students attended Georgia State University than any other institution.

## Seamless Enrollment by In/Out of State and Public/Private, Cohorts 2017-2023

Cohort	Private Out-of-State	Public Out-of-State	Private In-State	Public In-State
2017	16% (N = 225)	13% (N = 186)	8% (N = 112)	64% (N = 911)
2018	15% (N = 232)	13% (N = 194)	6% (N = 98)	66% (N = 1,008)
2019	14% (N = 200)	16% (N = 239)	5% (N = 80)	64% (N = 942)
2020	14% (N = 213)	14% (N = 211)	6% (N = 83)	66% (N = 965)
2021	14% (N = 198)	19% (N = 264)	7% (N = 103)	60% (N = 850)
2022	14% (N = 215)	21% (N = 323)	7% (N = 110)	57% (N = 870)
2023	14% (N = 224)	18% (N = 297)	7% (N = 115)	61% (N = 990)

Legend:
- Private Out-of-State
- Public Out-of-State
- Private In-State
- Public In-State

Note. Percentages are rounded to the nearest whole number.

Postsecondary enrollment rates vary across student racial/ethnic groups

From SY2017 to SY2023, Black, White, Asian, Hispanic, and Multiple/Other on-time graduates seamlessly enrolled in postsecondary institutions at different rates. Asian and Multiple/Other students seamlessly enrolled at lower rates in 2023 than in 2022. The seamless enrollment rate for White and Black students increased slightly in relation to 2022. The seamless enrollment rate for Hispanic students remained essentially constant from 2022 to 2023.

Seamless Enrollment by Race/Ethnicity, Cohorts 2017 - 2023
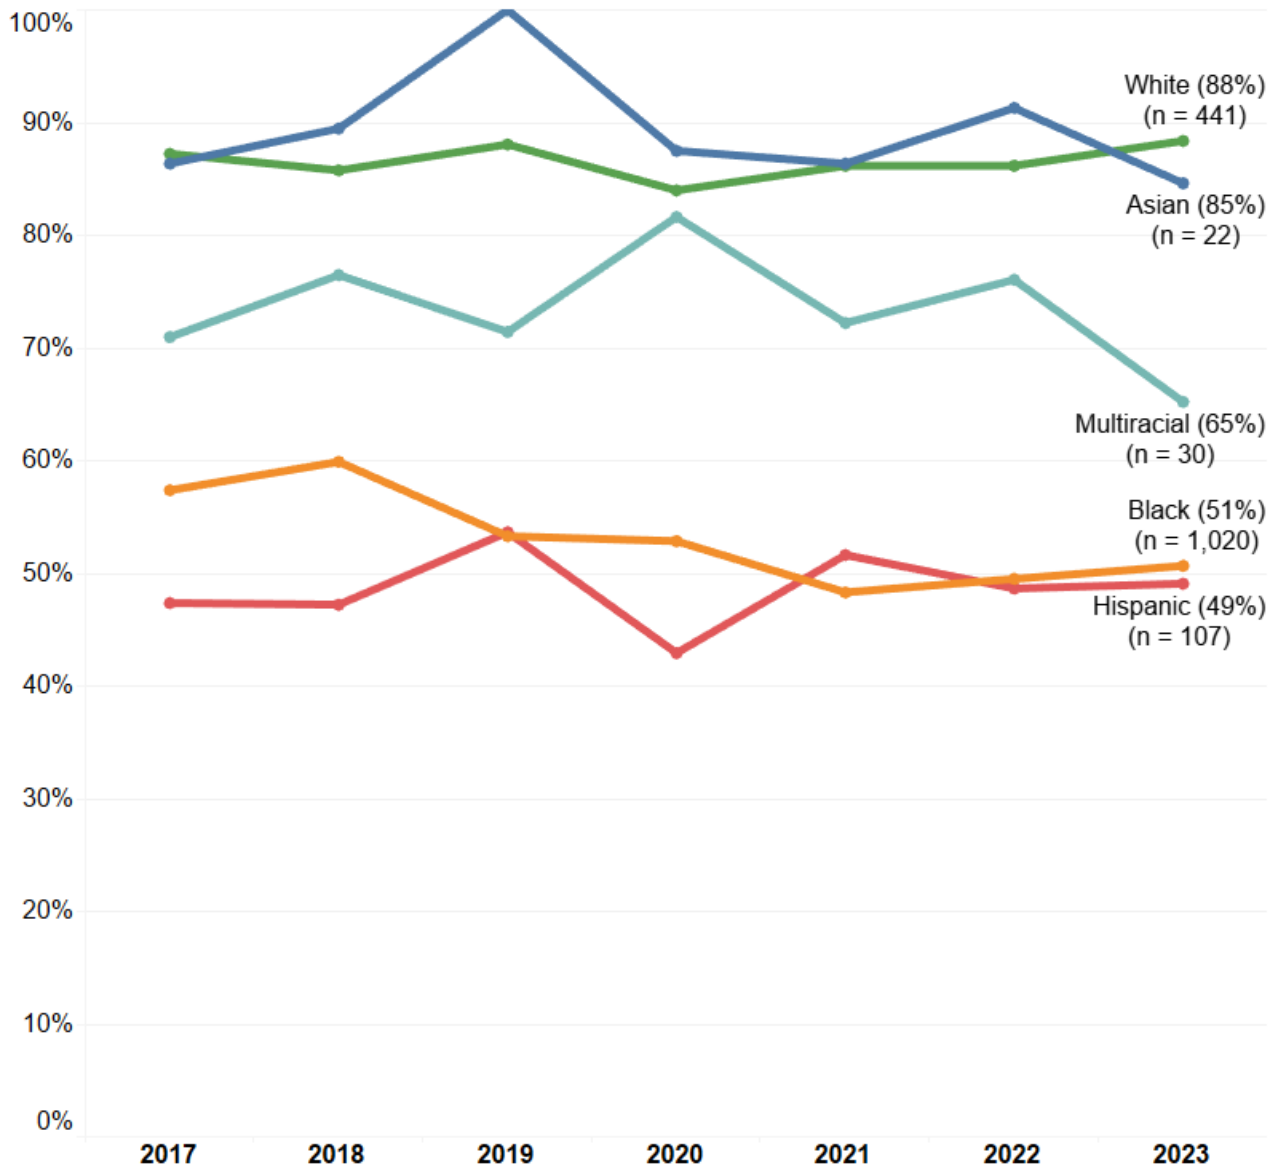

Seamless Enrollment by Race/Ethnicity, Cohort 2023
*Notes. In the **Seamless Enrollment By Race/Ethnicity, Cohort 2023** graph, the percentage and n size (number of seamless enrollees) reflect Cohort 2023. In the **APS Seamless Enrollment Rates by Race/Ethnicity, Cohort 2017 - 2023** graph, the numerator in the parentheses is the number of seamless enrollees and the denominator is the number of on-time graduates.* Racial/ethnic groups with less than ten SY2023 on-time graduates were excluded. Percentages were rounded to the nearest whole number.

Postsecondary enrollment rates vary by gender overall and within racial/ethnic groups

The left graph shows that a higher percentage of female Cohort 2023 students seamlessly enrolled in postsecondary institutions than male students, with 64% of on-time female graduates seamlessly enrolling compared to 51% of on-time male graduates. This gender difference is greater among Black and Hispanic on-time graduates, and equal among Asian and Multiple/Other on-time graduates. A slightly higher percentage of White female on-time graduates seamlessly enrolled compared to White male on-time graduates.

Seamless Enrollment by Gender, Cohort 2023

**Seamless Enrollment by Race/Ethnicity and Gender, Cohort 2023**
Notes. Racial/ethnic and gender groups with less than ten on-time graduates were excluded. In both graphs, the numerator represents the number of seamless enrollees, and the denominator represents the number of on-time graduates. Percentages were rounded to the nearest whole number.

Postsecondary enrollment rates are lower among students with disabilities, English learners, and economically disadvantaged students

From SY2017 to SY2023, economically disadvantaged students, students with disabilities, and English learners who graduated on time seamlessly enrolled in postsecondary institutions at lower rates than the general population of on-time graduates. Enrollment among economically disadvantaged students have gradually increased to 47% and among students with disabilities to 38% since a 6-year low in 2021. English learners have seen a year over year decline since 2021, with a seamless enrollment rate of 31% in 2023.

Seamless Enrollment by Subgroup, Cohorts 2017 - 2023
Seamless Enrollment by Subgroup, Cohort 2023
Notes. These categories are not mutually exclusive; students may belong to one or more of these categories simultaneously. In both graphs, the numerator represents the number of seamless enrollees, and the denominator represents the number of on-time graduates. Percentages were rounded to the nearest whole number. English Learners are students with limited proficiency in English, are part of an ESOL program, or within two full years of exiting the ESOL program.

The percentage of high school graduates who seamlessly enrolled in college increased by 2 percentage points from cohort 2022 to cohort 2023

In this graph, the percentage of students who persisted in each year and graduated only includes students who seamlessly enrolled. Students may count in both persistence and graduate figures. For this analysis, college persistence is defined as remaining enrolled in a postsecondary institution as of October 1 in years following initial enrollment. A student _need not_ remain enrolled in the same institution to count as persisting; however, s/he must remain enrolled continuously (as of October 1 in consecutive years).

Seamless Enrollment and Persistence among On-Time High School Graduates, Cohorts 2017 - 2023
|	Seamless Enrollment	Persistence to Year 2	Persistence to Year 3	Persistence to Year 4	Persistence to Year 5	Persistence to Year 6	Graduate
2017	61%	46%	39%	34%	18%	7%	33%
2018	63%	45%	37%	32%	16%	7%	29%
2019	58%	44%	35%	30%	15%		23%
2020	57%	41%	34%	30%			4%
2021	55%	42%	35%				1%
2022	56%	43%					1%
2023	58%						0%

Note. Percentages are rounded to the nearest whole number; the 0% in the Graduate column refers to a percentage rounded down to 0%.

54% of cohort 2017 on-time graduates who seamlessly enrolled earned some kind of degree within 6 years

National measures of persistence and college graduation rates typically consider the percentage of *enrollees* who persist and graduate. Of APS on-time graduates who seamlessly enroll in college, about three out of four persist to year 2. Cohort 2017 is the only cohort in the graph whose members have had six complete school years to earn a post-secondary credential. In this graph, the percentage of students who persisted in each year and graduate only includes students who seamlessly enrolled. Students may count in both persistence and graduate figures. Nationally, the 6-year graduation rate for students who entered college in the fall of 2017 was 62.2%.

Enrollment Persistence among Seamlessly Enrolled Students, Cohorts 2017 - 2023
Note. Percentages are rounded to the nearest whole number. The National 6-year graduation rate for students entering college in the fall of 2017 comes from Completing College).

Many students enroll at institutions with lower-than-average institution graduation rates.

This table shows institutional and APS graduation rates for schools that enrolled at least 15 APS on-time graduates from cohort 2017 (i.e., students have had 6 years to graduate). APS students who attend postsecondary institutions with low graduation rates may require additional supports to be successful.

Graduation Rate Legend

ALABAMA A & M UNIVERSITY	4-year	16	31%	31%	27%
MOREHOUSE COLLEGE	4-year	15	53%	40%	53%

APS Grade Rate (Any) includes students who earned a degree/certificate from <u>any</u> institution within 6 years.

APS Grade Rate (Same) includes students who earned a degree/certificate from the same institution at which they were first enrolled, which is consistent with the definition used for the institutional graduation rate.

Institution Grad Rate comes from the Department of Education's College Scorecard and is the percent of students who enrolled in the fall as first-time, full-time students and completed within 150 percent of the expected time.

For both APS graduation rates, the denominator is the number of cohort 2017 seamless enrollees who were full-time students during their first semester.

In this calculation, APS students at primarily 2-year colleges were given six years to graduate. For this reason, a direct comparison between APS Grad Rate (Same) and Institution Grad Rate (three years to graduate for 2-year institutions) cannot be made for 2-year institutions.

National graduation rate averages for students who entered college in the Fall of 2017 (Completing College):

     77.5% for 4-year private non-profit

     67.4% for 4-year public

     43.4% for 2-year public

Notes:
- To reduce variability from year to year, graduation rates are averaged across years. The institution graduation rates reflect cohort 2015 high school graduates and not cohort 2017 high school graduates (a two-year lag time is present).
- Students who transfer out <u>do</u> count against an institution's graduation rate.
- Percentages were rounded to the nearest whole number.
- Completion rates from Completing College include both full-time and part-time, first-time students who completed in six years.
- Atlanta Metropolitan State College and Albany State University also offer 4-year degrees.

2023 Background Information

In March of 2020, the global COVID-19 pandemic altered life for everyone. The 2023 graduating cohort attended high school during the pandemic; it is important to note that the pandemic may have influenced their postsecondary admissions credentials and postsecondary decisions. It is also important to note that the pandemic may have affected members of earlier cohorts in terms of their ability to complete a postsecondary credential or stay enrolled in a postsecondary institution. This report cannot account for the potential impact of the pandemic on postsecondary enrollment trends.

Data Sources

National Student Clearinghouse

Postsecondary enrollment rates are calculated using data provided by the National Student Clearinghouse (NSC). NSC is a subscription service used by APS to match graduates with college enrollment records. NSC obtains student data directly from participating college and university registrars typically on a monthly basis. NSC provides information for more than 3,600 U.S. postsecondary institutions. Postsecondary institutions that do not participate with NSC include four of the U.S. service academies (the United States Naval Academy has been a participant since August 2020).

There are several limitations to matching and reporting of enrollment data which may result in underreporting of college enrollment. Limitations such as name variations, name changes, and FERPA blocks may result in lower levels of matching. According to NSC, Georgia has a FERPA block rate of approximately 1%.

**College Graduation Rates**

Institution graduation rates come from the Department of Education's College Scorecard. National college graduation rates come from the NSC's Completing College National and State Reports.
