*The determination of whether or not a student met/exceeded their growth target is based on a calculation comparing the projected and observed growth. Each of these growth measures, as well as RIT scores in general, come with a standard error of measurement (SEM) meaning that the true score/growth lies within a range of values. We currently do not know how well MAP Growth data may align with Milestones SGP data - so each of these percentages will most likely vary from what a school and individual student might expect to see with growth data on the Georgia Milestones.

Needs Assessment

ACTIVITY

Needs Assessment

During this Needs Assessment, we will look at data from the Spring MAPS administration and identify 2-3 potential needs for the 2024-2025 school year.

This discussion will help school leadership as they complete the school's 2024-2025 Continuous Improvement Plan.

Needs Assessment: Guiding Questions

- What does this data tell us?
- What good news is there to celebrate?
- Where are growth opportunities?
- What trends do we see in the data?

Needs Assessment: Guiding Questions

• What does this data tell us?

- We are moving in the right direction in reading, however, we must continue work in this area to see significant increase in the percent of students toward proficiency and above.
- Math is an outlier. We must continue to learn the new standards and curriculum in order for students to achieve growth and proficiency.

• What good news is there to celebrate?

- MAP Growth spring report predicts we will meet our reading CIP goal for GMAS. The goal was to have a 3% increase in students scoring proficient or above from 22.3% to 25.3%. MAP results show 27% at proficient.
- We exceeded the MAP growth target goal in reading. The goal was to move from 38% to 41% meeting/exceeding MAP reading goal. MAP results show 57%
- 75% of Hispanics met their fall to spring growth targets/goals in reading, 63% exceeded in math.
- Overall for reading with SWDs, 50% exceeded their growth target compared to the

SMART Goals (Elementary and Middle Schools)

The percentage of students in grades 3-5 scoring proficient or above on the GA Milestones Literacy Assessment will increase from 22.3% to 25.3%.
The percentage of students in grades K-5 that met their fall-to-spring growth goal on MAP Reading will increase from 38% to 41% in May 2024.

The percentage of students in grades 3-5 scoring proficient or above on the GA Milestones Math Assessment will increase from 18.8% to 21.8%.
The percentage of students in grades K-5 that met their fall-to-spring growth goal on Math MAP will increase from 41% to 44% in May 2024.

The amount of OSS days will decrease by .10 points.

Needs Assessment: Guiding Questions

- **What trends do we see in the data?**
 - In math, a larger percentage of students were at the beginning level in the spring as compared to fall at the district & school level.
 - The gap is closing between Hispanics and All Students in reading.
 - The gap is closing between SWDs and All Students in math.
 - At the school and district level, the percentage of students flagged for reading increased from fall to spring. However, the percent of students who moved to oral reading (fluent) increased by 8%.
 - What are growth opportunities?
 - Continue to internalize new math curriculum and materials.
 - Devise a strategic plan to address non-readers through the science of reading and strengthen writing skills.

Needs Assessment:

What are two to three (2-3) needs we can identify based our data?

	Need
1	We will need reading interventions.
2	Focus on moving scholars from proficient to distinguished.
