Student Agency

Why?

Why it matters...

To liberate one's self is both to break through to agency and to refuse to allow others, whatever their status to violate you.

The idea of agency has 2 parts:

- The spirited will to save oneself and others
- The acceptance of the critical responsibility that comes with that agency

“It is this realization at the moment of decision that marks the most powerful identification of personal and collective liberation with genuine education.” -Asante, p 71
