

ATLANTA
PUBLIC
SCHOOLS

Long Middle School & Verizon

are partnering to help scholars achieve, learn, and create more by providing each scholar with a digital device, free internet access, and 21st century technology-infused lessons delivering a new way of learning both in school and at home.

Long Middle School is committed to empowering students with the confidence, social skills and intellectual capacity required to successfully thrive and compete in the global marketplace. Atlanta Public Schools believe that the Verizon Innovative Learning School (VILS) opportunity will strengthen our mission and provide our students with opportunities to grow as digital citizens in an ever-changing global society.

The Digital Promise Innovative Learning Schools Grant collaborates with Verizon to equip every student and teacher at select middle schools with a device and up to a four year data plan, to fill the need of the students nationwide who lack access to technology and the skills to succeed in the digital world.

PARTNERSHIP BENEFITS

ALL of Long Middle School's Scholars and all Faculty will receive benefits from Verizon's charitable efforts and activities. This includes dedicated devices and accessories for all students and teachers, each with 10GB of data monthly, year round for access in and out of school.

What about SUPPORT and TRAINING?

With this grant, we will be getting training and support from the VILS team as well as a dedicated Tech Coach paid for by the grant. The dedicated Tech Coach will spend time with teachers and students building their technology skills and working to grow our students into digital citizens.
