

January 21, 2022

In our last communication to the families of elementary students in the Midtown cluster, we informed you of the likelihood that this would be the final year of an Advanced Math course, designation, and/or code in Infinite Campus. As such, we will no longer offer an Advanced Math course for elementary students after this semester.

As we prepare our staff and students for new math standards and content changes, we will continue to offer academically challenging and differentiated instruction for all students. Additionally, our teachers will continue to teach the Georgia Standards of Excellence. We will also continue to provide extension and enrichment to advanced students, regardless of the course. Our teachers are trained in differentiation and understand how to meet the needs of advanced learners.

We continue to be dedicated to the academic success of our students and we are committed to making sure that all students grow and thrive as mathematicians!

Sincerely,

The Elementary Principals of the Midtown Cluster &  
Curriculum & Instruction Office of Atlanta Public Schools
