Winter 2025

MAP GROWTH

Data Review

Agenda

1. Achievement vs. Growth on MAP Growth
2. MAP Growth Achievement Quintiles
3. MAP Growth SGP Quintiles
4. MAP Growth Subgroup Comparisons
5. Khan Academy + Lexiles

What does each data point mean?

Achievement

Students are given a PR and a RIT score.

- A RIT score is an estimate of a student's instructional level.
 - A higher RIT score indicates higher mastery in a subject.
 - The RIT scale ranges from 100 to 350, from KK to 12th grade.
- The PR (percentile rank) tells us how a student performed outright in comparison to their peers.
 - A PR of 76 means that student's RIT score was at or above 76 percent of their same-age peers.

Growth

Students are given an SGP.

- The SGP (student growth percentile) can be adjusted based on the time-period. We are looking at Fall to Winter SGPs.
 - The SGP tells us how much a student grew during the specified time-period in comparison to their peers who **also started at the same RIT score in the Fall.**
 - An SGP of 76 means that student grew the same amount as (or more than) 76 percent of the students who started in their same RIT score group.
- SGPs can be predicted by NWEA.

Connecting RIT Scores to Lexile Levels

Mary Lin PTA, PTO, Foundation?

- The PTA Special Committee is recommending that we form a new PTO by combining the PTA and the Foundation and disaffiliate from the national/state PTA.
- Anticipated benefits include less confusion about “who's doing what,” a more unified approach to fundraising and school support, and the ability to shape the organization for Mary Lin's specific needs.
- The Special Committee has been holding listening sessions to answer questions and hear the thoughts of our parent body.
- Upcoming Listening Session dates (via Zoom, links will be in Rocket Blast):
 - Tuesday, February 4 at 12 pm
 - Monday, February 10 at 8 am
- This topic is on the agenda for the February 27 general PTA Meeting.
