V. Discussion Items

- a. BASC-3 results
 - i. Students are given an overall school based on how far their score is from the group average.
 - ii. Assessment is for grades K-5 administered by the teachers
 - iii. 476 out of 486 students were screened (students not screened did not have the minimum of 6 weeks of observation prior to test)
 - iv. Students in grades 3-5 have option of self-assessment as well and parents can opt-out
 - v. Reviewed differences between teacher assessments and self-assessments. Students assessed themselves as at much higher risk than teachers. May be because of how students interpreted the questions.
 - vi. Would be interested in see individual questions and how students rated themselves. Can we make certain questions clearer?
 - vii. Students with “elevated” or “extremely elevated” risk score were interviewed by the school counselor, Mr. Steward to provide additional options and interventions. Many students had already previously been identified. Most beneficial for identifying students with potential anxiety.
