i. MAP Results

ii. 2025 GA Milestones Results

MAP and 2025 GA Milestones data was reviewed collectively. Ms. Culbreath asked, "how does HAES data compare to similar schools with similar demographics?" Dr. January responded, "That's a good question. Each year the data changes and the schools that were once in the same grouping or range may not remain the same because each year is a year for growth. Every 3 years the data is reviewed to see what schools can come off or be added to the list. This is a pivotal year for us because our data will be reviewed to see if and when we are coming off the list.

Mrs. Jewell noticed that there was an 8% and 9% increase in 3rd grade data and asked if we knew what caused the increase. Dr. January shared that we began to showcase teachers with expertise and share their practices with their peers to strengthen consistency of practice in classrooms.

Ms. Elder noticed that the data focuses on grades 3-5 and wondered would information be provided on the readiness of the rising 3rd graders. Dr. January mentioned that AMIRA testing could provide this information and that iReady math had been purchased to provide the information for mathematics. Dr. January also shared that IXL will be purchased and that all technology platforms will be accessible for home use.
