

## JEAN CHILDS YOUNG MIDDLE SCHOOL

# Mathematics

The mathematics department at Young is committed to providing a quality mathematics education to all our students. Our goal is to ensure that ALL students are mathematically proficient on or above grade level.

Our instructional focus is on helping students master the Georgia Performance Standards in order to prepare our learners for college and careers. Young uses the AMPLIFY Mathematics curriculum to teach the Grade level standards. Additionally, students who are not yet mathematically proficient receive additional mathematics support through intervention and/or REP (remedial mathematics) programs using the MATH 180 curriculum.

Please use the QR codes below to access the parent sites for AMPLIFY and MATH 180. Each site contains more information about each program and how you can support your child at home. You will also find a link to the Georgia Performance Standards to see what skills your students are expected to master this year.

If you would like additional information about our mathematics department, please reach out to your child's mathematics teacher or to our Math instructional coach, Dr. Bennett
