

Did you know that as an APS student you can take college-level courses while also earning credit toward both high school and college?

Dual Enrollment is designed to prepare students for college and career opportunities leading students to postsecondary institutions for an industry recognized certification or licensure, an associate and/or higher college degree, and successful employment. Georgia has created a singular program known as Dual Enrollment for students in grades 10-12 who qualify to participate. Students may enroll on a part-time or full-time basis as a Dual Enrollment student and take college courses at their high school as available or on a postsecondary campus. Students will receive high school and college credit simultaneously when attending and passing approved college classes.

Benefits of Dual Enrollment for APS Students include:

- Earning college credits while still in high school may enable students to graduate early and/or possibly even earn an associate degree, diploma or certificate.
- Dual enrollment can help students adjust to certain aspects of the college experience (e.g., classes, coursework, instruction, being on a college campus) so the transition from high school to college may be easier.
- Students who participate in a dual enrollment program are more likely to go to college and earn a degree.
- Students may be able to take classes that are not offered at their high school, especially in subject areas they are interested in for a potential career.
- Taking college-level classes while still in high school may build confidence and encourage those students who may not be thinking about college to reconsider.
