

Governor's Honors Program

2023 Course Descriptions and Selection Criteria

Glossary

GHP Coordinator: The individual tasked with officially submitting GHP nominations for state level consideration for the respective district or private/independent/state charter school.

Local Selection Process: Each public school district, private school, and state charter may create its own process for choosing nominees for GHP. The selection criteria can vary depending on the district or school. GHP requires that the process be fair, equitable, and comply with any state or federal requirements for those with disabilities.

Nominating Educator: The educator (teacher, guidance counselor, or administrator) responsible for suggesting students for consideration in the local selection process.

Recommender: An individual selected by the nominee (not necessarily an educator) who is an unrelated adult that can strongly articulate the nominee's level of passion, skill, knowledge, and experience in their area of nomination, as required, in the application process.

State Level Applicants: Students who have accepted the nomination and completed the application process.

State Level Nominees: Students nominated by their respective school districts, private/independent schools, or state charter schools for consideration to attend GHP.

What is the Governor's Honors Program (GHP)?

The Georgia Governor's Honors Program (GHP) is a residential summer program for skilled, knowledgeable, and talented high school juniors and seniors. GHP offers instruction that is significantly different from the typical high school classroom and is designed to provide students with academic, cultural, and social enrichment necessary to become the next generation of global critical thinkers, innovators, and leaders.

Who is a GHP Student?

A GHP student is a rising junior or senior that exhibits an undeniable level of passion in their preferred subject, and an appetite to learn on a deeper level that cannot always be fully satisfied in a high school classroom. GHP caliber students will find ways to study and explore their subjects independently from a classroom environment, at times despite a lack of resources.

Prospective GHP students should know that selection to the Governor's Honors Program is highly competitive. Students should have passion in the area of nomination, desire to attend GHP in the summer, willingness/ability to live in a residential setting for the full-length of the program, and the capacity to be fully engaged in the curriculum for the duration of the program. This is the minimum threshold for consideration for the program. The most successful student candidates additionally have the attributes, experiences, and skills outlined in the selection criteria provided for their area of nomination.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022)

A successful GHP student will:

- Be inquisitive.
- Demonstrate a high capacity for processing information.
- Think and learn rapidly.
- Demonstrate a high capacity to analyze and/or think abstractly.
- Gravitate to more high-level conversations, not always available with peers.
- Demonstrate intensity and passion about his/her area of nomination.
- Develop interests in activities that foster cooperation and humility.
- Exhibit the social and emotional maturity to interact respectfully, cooperatively, and appropriately with peers, instructors, and program staff.

Guidance on Selecting GHP Nominees to the Governor's Honors Program

The Instructional Descriptions and Selection Criteria serve as guidance for GHP coordinators, nominating educators and students. The document includes a brief instructional description, and the criteria for each major. Coordinators and nominating educators should carefully consider this information as they select their student nominees. The Governor's Office of Student Achievement (GOSA) strives to promote equity and fairness in the selection process for GHP candidates. To aid that effort, GOSA strongly encourages GHP coordinators and nominating educators to review the selection criteria.

Prospective GHP students are evaluated in the context of their area of nomination. However, students are also evaluated in the context of the social and emotional maturity required to thrive in an intensive learning environment, and residential setting. Selected students are expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by the GHP Office.

Selection Process

Step one (district/private school/state charter nomination to the state level): The local districts/private schools/state charters nominate their students based on local criteria. Each public school district, private school and state charter may create its own process for choosing nominees for GHP. The selection criteria can vary depending on the district or school. GHP requires that the process be fair, equitable, and comply with any state or federal requirements for those with disabilities.

Step two (students submit an online application): State level nominees (students nominated by district/private school/state charters) will be notified of their nomination by the GHP office and guided to an online application which will provide the specific criteria for areas of nomination. The application must include strong support from a recommender and official records verified by a school administrator.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page 3 of 28 Each application must include all required components and should be fully completed. Incomplete applications will not be considered.

Step three (semifinalist invitation to the state level interview/audition): Students' applications will be scored by content area experts (educators and professionals) for each major. Semifinalists will be chosen in each area of nomination and invited to attend the state level interview/audition (Saturday, March 11, at Georgia Southern University). Interviews will include content area and some non-academic questions. Depending on their nomination area, a student may also participate in a performance task (written examination, oral examination, artistic demonstration/audition, debate simulation, etc.) during the semifinalist interview and audition. Specific instructions will be provided in advance for those invited to interview/audition.

Step four (finalist selection): Finalists (i.e., applicants who are offered admission to the summer program) will be notified via the application portal by the GHP office on April 7, 2023 and must formally accept or decline the offer via the application interface. The deadline to formally accept or decline the offer is April 14, 2023.

Nomination Areas

- Agricultural Research, Biotechnology, and Science
- Communicative Arts
- Computer Science (NEW!)
- Dance
- Engineering
 - Mechanical Design
 - Mechanical and Electrical
 - Programming
- Mathematics
- Music
 - o Brass: Euphonium, French Horn, Trombone, Trumpet, Tuba
 - Jazz: Electric or Acoustic Bass, Drums, Guitar, Piano, Saxophone, Trombone, Trumpet,
 Vibraphone
 - Percussion
 - o Piano
 - o Strings: Cello, String Bass, Viola, Violin
 - o Voice: Soprano, Alto, Bass
 - Woodwind: Bassoon, Clarinet, Flute, Oboe, Saxophone
- Science
 - o Biology/Environmental Science
 - Chemistry
 - Physics
- Social Studies
- Theatre Performance
- Visual Arts
- World Languages
 - o Chinese
 - o French
 - o German
 - o Latin
 - Spanish

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022)

AGRICULTURAL RESEARCH, BIOTECHNOLOGY, AND SCIENCE

Instructional Description

The GHP Agricultural Research, Biotechnology, and Science Department is designed to provide a comprehensive contemporary program of research-based education for students interested in the agricultural sciences. The courses are modeled for students to learn about opportunities for research and analysis in agricultural sciences. Instruction is organized around ways people are likely to encounter environmental science, agricultural research, and biotechnology in a university setting. The curriculum introduces students to courses and laboratory experiences similar to sophomore/junior level college courses and includes a research project. Students gain knowledge through exploration of topics in soils, hydrology, forestry, natural resources, as well as biotechnology for plants, animals, and the environment. Students will also participate in intradisciplinary courses in chemistry, biology, and physics.

By the end of the program, students will have an increased understanding of the complex biological, physical, and socio-economic factors that shape agricultural systems and various professions in agriculture (e.g., the roles of a technician, researcher, food producer, etc.).

Topics of study have included:

- Laboratory Techniques and Procedures Research Methodology
- Environmental Science and Stewardship Genetics in Agricultural Biotechnology
- Natural Resource and Conservation Management Plant and Animal Biotechnology Applications Soils and Hydrology
- Urban and Community Practices Energy Systems
- International Agriculture and Policy

Selection Criteria

GHP Agricultural Research, Biotechnology, and Science nominees should have a high-level passion and curiosity, and knowledge/awareness of the current state of agriculture in terms of applied research and systematic approaches to the industry. Students are also expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Note: Although participation in science fairs, clubs, etc., may support evidence of the skills found in a strong candidate, a citation alone is not a sufficient demonstration of the selection criteria. Similarly, nominating educators are encouraged to nominate students they believe to be passionate and knowledgeable in the sciences even if traditional forms of recognition are not present.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page 6 of 28

Academic Record

- Strong academic record in agricultural science, with a focus in biotechnology, environmental science, and/or a directly related area.
- Involvement/experiences in agriculture above those associated with school-related requirements.

Skills

- Understanding of environmental science, biotechnology, knowledge of the agriculture industry, including products, production, uses, and current issues.
- Ability to read and synthesize peer-reviewed research
- Research, laboratory experience, and safety skills.
- Capability to thrive in a group study environment and approach new agricultural science-based inquiries in a positive and receptive manner.

- Online application will include a video submission.
- Semifinalists in agriculture will participate in an individual interview showcasing interest in the subject. Students should be able to showcase prior experiences and ideas to expand research opportunities.
- Semifinalists may be provided pre-site and on-site peer-reviewed research articles related to current agricultural research. With these articles, students must synthesize a response to a given prompt for the writing/composition component of the interview process using the data and information provided.
- Strong candidates will exhibit sufficient preparation, a command of facts and knowledge, confidence in articulating the issue, impacts, and interest in the topic.

COMMUNICATIVE ARTS

Instructional Description

The GHP Communicative Arts department offers an intense exploration of the various components comprising the Communicative Arts. Specific content stretches beyond those topics found in the typical Georgia high school curriculum by exposing students to new and contemporary texts, more obscure classical texts, and teaching students new ways to interact with texts they may encounter in the future. Courses are designed and taught by various instructors. Each week, an instructor teaches two "experiences," which consist of 10 -11 hours of seat time with reading and individual writing by each student after class hours.

Coursework involves student-led as well as instructor-led discussion, debate, journaling, collaborative creativity (e.g., improvisation, slam poetry, comedy, film study, documentary production), performance, and various modes of writing assignments. Students have opportunities to produce written or performative responses (personal, creative, and analytical) to the course texts. Students are encouraged to try many new styles of writing, composition, and read many new genres and forms.

By the end of each course experience, students should have achieved a new way of interacting with a text and understanding of the work's relationship to other texts and the world to which it belongs. Students expand their reading experience during the program, moving beyond contemporary popular fiction and school assignments. All finalists must communicate fluently in English prose writing.

Topics of study have included, but are not limited to:

- The study of post-structural critical theories and their application in the reading of a variety of texts.
- The study of the aspects of the English language, including linguistics.
- The study of literary ideologies including modernism and postmodernism.
- The study of the impact of race, class, and gender on literature and life.
- The composition and performance of literary works, including poems and plays.
- The examination of popular culture and the nature of media and media literacy.
- The extended analysis of nontraditional school literature, specific genre fiction, and film.
- The interdisciplinary nature of literature and art.

Selection Criteria

Communicative Arts nominees should have passion for literature and be able to respond critically to literature and media as well as thrive in a discussion-oriented environment as an active participant; additionally, nominees may show an avid interest or pursuit in creative writing. Students are also expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page 8 of 28

Skills

- Exposure to reading and writing beyond the classroom and "popular" fiction.
- Analytical and synthesis skills and willingness to explore various media of communication (e.g., theater, art, literature, film).
- Strong candidates will have an appreciation and knowledge for the literary canon and canonical authors. Students can and are eager to deal with unfamiliar and ambiguous texts, and new formats and genres of "texts" through independent reading, shared reading, and full group discussions.
- Strong communication skills (writing, speaking, and listening) in student-led class or small group discussions.

Interest Area

- Demonstrate interest in communicative arts through relevant extracurricular activities and pursuits (e.g., school newspaper, literary magazine, yearbook, theater, independent research, blogging, creative writing, and work and/or volunteer-related experiences).
- Students should genuinely enjoy discussion and exploration of various mediums of communication (e.g., theater, art, literature, film).
- Students should also express an interest or pursuit of various writing modes outside of the
 regular classroom experience or assignment--creative writing, whatever the form: poetry,
 playwriting, short stories, novels, etc., as well as expository writing beyond a typical advancedlevel course essay. For example, a nominee may indicate a desire to become a journalist,
 novelist, playwright, or freelance writer as a profession (however, such an interest in writing as a
 profession is not a requirement).

- Semifinalists in communicative arts will be provided a reading period during which they will
 examine text excerpts selected by the GHP Communicative Arts Department, and then
 participate in a group discussion with other communicative arts candidates to analyze and
 synthesize those texts.
- Semifinalists in communicative arts will also participate in an individual interview.

COMPUTER SCIENCE (NEW!)

Instructional Description

The GHP Computer Science major will be focused on topics such as front- and back-end web development, cybersecurity, intelligent systems, program construction, data structures, networking, and general computer systems. Students are expected to gain a fundamental knowledge of computing concepts that they may then explore and apply to novel creations (e.g., websites, databases, and apps within a secure framework). During the summer, computer science majors will learn/gain:

- A general and robust understanding of computer science concepts and programming
- The ability to think algorithmically and solve programming problems efficiently
- Concepts like abstraction, data structures, object-oriented programming, secure techniques, software engineering, and web/app development
- Best practices with computer languages such as C, Java, Python, PHP, SQL, JavaScript, CSS, and HTML

Selection Criteria

Applicants should have an avid interest and passion for computer concepts. Familiarity with, and exposure to, various programming languages and concepts is necessary. Advanced level computer science can be helpful, but not required. Students are also expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Interest Area

A nominee's experience should go beyond that of a normal classroom. Top candidates will be those who have various projects they have completed outside of school, such as (but not limited to) interactive websites, custom network systems, database construction, and/or machine learning decision engines.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page **10** of **28**

DANCE

Instructional Description

The GHP Dance department goals are defined through three main objectives:

- Instructional audition preparation for the dancer through various styles of dance.
- Personal interaction with a variety of educators, choreographers, and other dancers.
- Expansion of student ideas of what defines a dancer and awareness of individual goals.

Students participate in four categories to meet the dance program objectives and to expand their knowledge and technical level of dance, aesthetic judgment, definition of dance, and their interpersonal skills.

<u>Daily Technique Classes</u> in ballet, pointe, modern, jazz, and improvisation are taught by faculty, guest educators and students.

<u>Choreography</u> encourages students to develop their own artistic statements through improvisation and rehearsed performance pieces.

<u>Performance Skills</u> are developed through daily rehearsals, open rehearsals, ballet lecture/demonstrations, improvisation, and concerts during the final week of the program.

<u>Dance History</u> is presented through lecture/discussions, videos, films, student research, and presentations to the class of various dancers/choreographers.

Selection Criteria

Dance nominees should have a firm ballet foundation, strong technique, and artistry in their primary style of dance, be self-driven, open-minded, and motivated to pursue a life in dance. Students are also expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Academic Record

Strong academic record is preferred, but not required.

Skills

- Flexibility and at least two years of technical ballet training including barre, adagio, petite allegro, grand allegro.
- Students must be able to cope with a demanding practice and performance schedule. Finalists are expected to practice a minimum of four hours per day during major instructional time with additional rehearsals in the evenings.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page 11 of 28 Strong candidates will have a passion and willingness to explore a variety of approaches to
dance. They will execute the following skills on both the right and left with superior technique:
splits, double pirouette, leaps, leg extensions, arabesques, fouettés, a la seconde turns,
developpe and body positions.

Interest Area

 Demonstrated interest in dance through relevant extracurricular activities, artistry, and knowledge of dance (e.g., participation in dance intensive camps, competition and convention training, master classes and dance performance clinics, independent study, and work and/or volunteer-related experiences).

- Semifinalists should arrive in good shape, free from injury or illness and ready to work hard in a fast-paced environment.
- Semifinalists are required to participate in a two-hour performance class and an individual interview.
- Semifinalists must wear appropriate attire to audition and do not need to bring a change of clothing for the interview portion.
- Female students must dress in a solid color leotard (black leotard preferred) and pink transition tights. Female semifinalists should bring pink ballet shoes and jazz shoes (No Pointe shoes).
 Male students must dress in black or white fitted shirt and black transition tights. Male semifinalists should bring black ballet shoes and jazz shoes. In every instance, hair should be securely fastened away from face and neck.

ENGINEERING

Instructional Description

The GHP Engineering major centers on a problem-oriented design project, based around utilizing mechanical design, mechanical/electrical engineering, and computer and software engineering technologies. While working on their projects, students will learn to conceptualize, create, analyze, and market effective solutions to engineering problems. Although students interview for only one of three concentrations (mechanical design, mechanical and electrical, or programming), they are introduced to professional practices in all three concentrations at the beginning of the summer.

During the first week, each instructor teaches the fundamentals of his/her discipline to rotating groups. In the second week, students "specialize" in the area for which they interviewed, learning a more focused set of skills and techniques. Students devote the remaining two weeks to group projects, working in small teams to prototype an invention. Teams consist of at least one student from each concentration (mechanical design, mechanical and electrical, programming) which allows students to be experts in their area as they work toward a mutual goal.

<u>Mechanical Design</u> involves planning and developing a project through a variety of methods, including CAD and 3D modeling. The mechanical design subfield focuses on engineering driven design and ranges in scope from industrial design and user interface design to design for manufacturing. This is not graphic design, although having some graphic design or art experience may be useful.

Mechanical and Electrical involves planning and developing a project through rapid prototyping techniques and circuit design and development. The mechanical and electrical engineering subfield emphasizes the use of rapid prototyping technologies ranging from foam/cardboard modeling to more advanced tools such as 3D printers, CNC routers, electronic circuit design, and construction. The scope of the subfield ranges from topics such as robotics and mechanical actuators to digital circuit design and circuit prototyping technologies.

<u>Programming</u> will be focused primarily on the coding needs that underpin the engineering project each team will invent, including software language and programming as needed.

Selection Criteria

Engineering nominees should demonstrate creativity and abstract thinking abilities. They should share exploration and curiosity in their school and off-time. Students are also expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page 13 of 28 Nominees must have experience in programming. Advanced level Computer Science can be helpful, but not required. Nominees should have program experience beyond the normal classroom. Top candidates will be those who have one or two projects they have programmed outside of school such as (but certainly not limited to) phone apps, video games, interactive websites.

Academic Record

- Strong academic record is preferred, but not required.
- Prior coursework/experience in robotics, mechatronics, design, engineering, circuits, and/or programming related courses is recommended (students may still be considered if these courses are not offered at their school).

Skills

- Genuine interest and high motivation to learn.
- Willingness and capable (expectation) to work in a team setting.
- Ability to work in a fast-paced, sometimes stressful environment.
- Ability to meet deadlines.
- Strong candidates will have project, problem-solving, design, or research experience developing a product in the concentration in which they are nominated.

Interest Area

Strong candidates will demonstrate interest in engineering beyond the classroom through
relevant extracurricular activities and pursuits (e.g., coding or programming, developing
applications, involvement in robotics club, competition team, and work and/or volunteerrelated experiences). Candidates should have a true dedication and passion for the area of
nomination.

- Engineering semifinalists will participate in an individual interview as well as portfolio review.
- The engineering portfolio must include examples (pictures, drawings, etc.) of the student's interests and work products in engineering (design, mechanical/mechatronics, or software).
- Portfolios may also be presented on a device or electronic medium (i.e., mobile phone, tablet, or laptop) if the device does not exceed laptop size. Projectors are not necessary and will not be permitted. Semifinalists should be mindful that electronic portfolios or demonstrations must fit within the interview time limits. GHP cannot guarantee that internet access (e.g., Wi-Fi) will be available at the interview site.

MATHEMATICS

Instructional Description

The GHP Mathematics department broadens students' exposure to various branches of mathematics. Courses are tailored to reflect the diversity of both students and mathematics and offer challenges to students within their knowledge base. Topics range from computer programming to proof-oriented courses to application-oriented courses but are all concentrated on techniques of problem solving.

Coursework involves small group work, large group work, cooperative projects, and individual effort. Students solve problems in cooperative, collaborative efforts, explain solutions to one another, present their research, and formulate new problems. Students also can develop a research project addressing a mathematics question of their own choosing.

By the end of the program, students will have an increased understanding of the breadth of mathematics, awareness of the place of mathematics in their world, and the ability and confidence to attempt previously unknown or difficult problems.

Topics of study have included:

- Programming
- Polynomials
- Complex number
- Computer science nuggets
- Number theory, graph theory, set theory
- Sequences and series
- Mathematical challenges
- Weird math
- Problem-solving
- Cryptology
- Counting is Fun (arrangements and permutations)
- Proof techniques
- Algebra matrix analysis

Selection Criteria

Mathematics nominees should have an intense interest in mathematics, be highly inquisitive, and enjoy learning new mathematical concepts and applications. Students are also expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page **15** of **28**

Academic Record

• Strong candidates typically possess a minimum 3.5 GPA and have scored in the 80th percentile or higher on at least one standardized exam (PSAT, SAT, or ACT); however, other candidates who have a curiosity and/or passion for mathematics should also be considered.

Prior coursework in geometry, algebra, and/or trigonometry is recommended. Advanced level courses can be beneficial in preparation for the summer program but are not required.

Skills

- Strong analytical skills, determination, and curiosity about real-world mathematics applications.
- Ability to reason creatively and independently.
- Appreciation for a wide variety of mathematics.

Interest Area

Strong candidates will demonstrate interest in mathematics beyond the classroom through
relevant extracurricular activities and pursuits (e.g., math club, academic team, Mu Alpha Theta,
independent study, and work and/or volunteer-related experiences).

- Mathematics semifinalists will participate in an individual interview and are evaluated on a variety of factors, inclusive of, but not limited to, interest, ability, and desire to learn.
- Specific interview criteria will be provided after semifinalists have been notified.

MUSIC

Instructional Description

The GHP Music department consists of seven areas – brass, jazz, percussion, piano, strings, vocal, and woodwinds. The curriculum is performance oriented and emphasizes ensemble skills. Ensembles range in size from duets and trios to large groups such as string and full orchestra, wind ensemble, and mixed choir. Students interested in GHP music must excel in their performance medium.

Students learn about elements of musical theory, analysis, criticism, history, practice, creation, synthesis, and aesthetics in an artistic and supportive environment. They are afforded several recital and concert opportunities to display the results of their studies. Students can participate in a rotation of enrichment courses designed to expose each student to different facets within the field of music, including conducting, music theory, music technology, music history, music in film, as well as music in practice. Students also participate in performance-based final projects.

Opportunities for students usually include:

- Practicing/rehearsing individually and in ensembles directed by students and/or faculty.
- Performing in both formal and informal settings.
- Co-developing projects with other majors (music and dance, music and art, etc.).
- Analyzing and critiquing music repertoire from antiquity to the present day.
- Attending concerts presented by other students.
- Engaging in creation of music through improvisation and composition.

By the end of the program, students will have established a basis for understanding how to study, prepare, and perform music in a variety of styles and settings. They will be familiar with standard literature for their voice or instrument, be able to demonstrate in performance the historical context and formal structure in the standard literature of each period and will have increased skills in tone production and technique needed to perform this progressive literature to at a well above average level.

Selection Criteria

Music nominees should be motivated to improve their performance technique, musical abilities, and hone their self-reflective criticism to prepare for a collegiate program of study. Students are also expected to, at all times, demonstrate integrity and respect for others at all times during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Academic Record

 Strong academic record is preferred. Student should have completed prior coursework or be currently enrolled in at least one music ensemble (or have received sufficient instruction) for consideration as a finalist.

> Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page 17 of 28

Skills

- Strong instrument/vocal performance skills
- Experience playing in groups as well as solo
- Sight-reading ability
- Ability to cope with a <u>demanding practice and performance schedule</u>
- Ability to work toward independent mastery in a short time frame
- Comfortable working with others in group environments and can adequately and honestly selfassess
- Vocal music nominees must:
 - Possess the prerequisite vocal skills to be selected for participation in honors choruses (all-state, district, or a school chorus)
 - Have a solid foundation of vocal technique, performance, and sight-reading skills at an above average level

Interest Area

- Visible evidence of motivation and curiosity that drives their interest in participating in musical opportunities outside of the regular school day. (e.g., youth orchestra, youth band, jazz band, garage band, ensemble, glee club, chorus, etc.).
- Interest in learning about music in a more in-depth manner than the average student.
- A strive for improvement, willingness to try something new or different, and response to instruction, criticism, praise, and adversity.

- Semifinalists must be able to articulate their goals, can play their selection well above average, and can sight-read with excellent technique.
- Semifinalists should be able to be specific about constructive criticism, techniques, and topics they have learned in music class and/or lessons and be able to self-identify areas for growth in their performance and technique.

SCIENCE

Instructional Description

The GHP Science department provides experiences that challenge students and fosters scientific thinking, research, and laboratory skills. The curriculum introduces students to courses and laboratory experiences like those encountered by college students taking sophomore/junior level courses and includes a research project.

Students should be nominated in one of the following concentration areas:

- Biology/Environmental Science
- Chemistry
- Physics

Students will focus a portion of the day in classes specific to their nominated concentration of study. Students will rotate through courses in topics of biology/environmental science, chemistry, physics, and agriculture, while developing/honing their laboratory and problem-solving skills in preparation for collegiate level research.

Students are expected to work together on projects and presentations employing the concepts and methods learned in the program. All students are encouraged to move beyond what they already know, or have accomplished, and to explore new, unknown territories of thought and investigation. Primary investigations will be confined to topics pre-selected by the staff for which the required equipment, resources, and supplies are available.

Selection Criteria

Science nominees should demonstrate academic excellence in the sciences, ask original questions, be able to analyze data, develop reasonable scientific explanations, and communicate scientific investigations and information clearly. Students are also expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Note: Although participation in science fairs, clubs, etc., may support evidence of the skills found in a strong candidate, a citation alone is not a sufficient demonstration of the selection criteria. Similarly, nominating educators are encouraged to nominate students they believe to be passionate and knowledgeable in the sciences even if traditional forms of recognition are not present.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page **19** of **28**

Academic Record

- Prior coursework in at least one semester or one academic year of biology, chemistry, environmental science, physics, anatomy, and/or a related science-based subject is required.
 Advanced level courses can be beneficial in preparation for the summer but are not required.
- Strong candidates demonstrate academic excellence in the sciences, possessing clear understanding of vocabulary, concepts, theories, and principles of biology, chemistry, and physics.

Skills

- Capability to thrive in a self-directed group study environment and approaching new science-based inquiries in a positive and receptive manner to resolve a problem.
- Desire and ability to work effectively in team settings.
- Adaptability and flexibility to cope with and overcome obstacles to arrive at a resolution.

Interest Area

- Demonstrate genuine curiosity about the natural world and the behaviors observed in the laboratory and beyond.
- Strong candidates utilize classroom material and apply research skills to current events and topics as extensions of their learning.
- Strong candidates have demonstrated interest in the subject area beyond the classroom through relevant extracurricular activities and pursuits.

Interview Expectations

- Semifinalists are assessed on their interest in science and ability to make connections based on evidence, analytical reasoning, and prior knowledge.
- Semifinalists participate in a group data analysis session followed by an individual interview.
- Strong candidates excel in interpreting graphs, analyzing data, and making inferences to draw
 conclusions and can discuss their findings during the interview portion. They can also convey
 knowledge and/or awareness of current scientific and technologically related topics, discoveries,
 and research.
- Strong candidates express interest in conducting scientific research and possess the curiosity to create original research questions across multiple fields of science.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022)

SOCIAL STUDIES

Instructional Description

The GHP Social Studies department includes multiple social science disciplines and emphasizes creating and analyzing responses and solutions to global, political, and social issues, as well as various national and international crises. Courses are designed and taught by various instructors. The course topics are selected by each instructor with the following guidelines: topics typically not covered in the Georgia high school social studies curriculum and/or topics that are barely touched upon by the Georgia high school social studies curriculum. Instructors are encouraged to consider simulations, Socratic style discussions, role playing, debates, and similar activities.

Activities students engage in include historical research, role playing, small and large group work, simulations, debates, projects, and writing activities. Students must become adept at quick, in-depth research and how to use it in various activities. They are often taught to effectively debate various viewpoints, enabling them to stretch and approach issues or concerns from different perspectives in order to consider multiple solutions/responses to an existing situation.

By the end of the program, students will be able to confidently articulate, support, and illustrate an academic or political point with both peers and adults.

Selection Criteria

Social Studies nominees should have a strong desire to learn about the relationships among individuals, institutions, and society. They should enjoy learning about politics and government, understanding various viewpoints, and becoming a responsible consumer of information. They are open-minded, inquisitive, creative, and respectful. Students are also expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Academic Record

 Strong academic records in social studies, political science, and/or civics focused courses is required. Advanced level courses can be beneficial in preparation for the summer but are not required.

Skills

- Strong analytical skills and the ability to think and reason creatively and independently.
- Knowledgeable about current geopolitical topics, officials, policies, and viewpoints.

Interest Area

• Demonstrate interest in the topics beyond classroom curriculum and assignments through relevant extracurricular activities and pursuits (e.g., Model United Nations, debate team, history

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page **21** of **28** day or social studies competitions, mock legislature, mock trial, and work and/or volunteer-related experiences).

- Semifinalists will participate in a classroom simulation and a United Nations Security Council simulation. Both will examine the semifinalist's knowledge and understanding of current issues, global concerns, and potential solutions. Topic areas are posted in advance of the simulation. Specific roles are assigned to semifinalists the day of the simulation.
- Semifinalists are evaluated on their research, preparation, flexibility, and ability to analyze and reason. A strong candidate will be confident and courteous.

THEATRE PERFORMANCE

Instructional Description

The GHP Theatre department introduces students to nontraditional approaches to character and ensemble development. The anticipated results are that the students will gain enriched acting skills, resources, and exhibit a deeper commitment to the process (not the product). Theatre coursework is conducted within an ensemble-oriented environment where students are encouraged to stretch themselves, take creative-choice risks and support others as they do the same. While the main focus of the program is acting, students will experience the integration of all functions of the theatrical process by identifying the connection between audience, actor, director, designer, construction crew, stage manager, and backstage crew. Students will try new approaches (followed by feedback from peers and instructors) and the hands-on experiences provided by public performances and other opportunities during the program.

Selection Criteria

Theatre nominees should have an open mind, the capacity and willingness to be a part of an ensemble, with the ability to lead and/or follow, and a passion and openness to explore a variety of approaches to acting and technical theater. Nominees also need to have a willingness to create, research and explore theater from different directions. Students are expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Academic Record

Strong academic record is preferred but not required.

Skills

- Superior level of dramatic understanding, characterization, script analysis, diction, and clarity of communication.
- Ability and willingness to analyze and interpret text and theatrical work to create and convey a
 fully realized three-dimensional person, character, or setting.
- Ability and willingness to research playwrights, time periods, and historical context for different plays.

Interest Area

 Genuine interest in theatre, demonstrated by pursuit of theatrical opportunities (e.g., acting, dance training or voice coaching, independent research, design or writing, and work-related or volunteer-related experiences).

> Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page 23 of 28

Interview Expectations

Theatre semifinalists will participate in a(n):

- Group Play Directing Exercise
 - The students will take turns directing each other in a cold reading from a preselected play.
 - The Play title will be provided to the semifinalists well before auditions.
- Cold Reading Exercise
 - The students will have cold readings from the selected play and take turns directing from these scenes.

Students should dress neatly and comfortably (no torn jeans, flip-flops, or t-shirts).

VISUAL ARTS

Instructional Description

The GHP Visual Arts department is primarily studio oriented. Students are introduced to different media, techniques, styles, and conceptual ideas not typically presented in most Georgia high schools. New ideas and challenging concepts in the visual arts are essential parts of the instructional program. A spirit of experimentation and risk-taking is promoted by encouraging students to venture into unfamiliar territory.

During the first week of the program, students are introduced to ceramics, drawing, painting, design, sculpture, and mixed media through rotational courses. Instructors introduce areas to students at an entry-level and alter difficulty based on individual knowledge. Students also learn from visiting artists in an intense three-day workshop in which they experiment with new techniques and have an opportunity to interact with the artist one-on-one. Students continue working on projects started during the week of rotations and begin working on a new body of work based on concepts, styles, philosophies, or material exploration.

Each student develops a portfolio of artwork, demonstrating the breadth and depth of individual ideas, to be submitted for a juried exhibition. An independent judge will select student artwork for the exhibit. GHP students, under the supervision of the art instructors, will install all selected works in an art gallery. An art opening reception will be held for the GHP community to view and appreciate the students' art.

By the end of the program, students will be more aware of the wide variety of media, techniques, and concepts that make up the visual arts today. Students will have obtained a positive art experience that promotes visual expression free of prejudice, stereotypes, and preconceived notions of the visual arts. They will have had the opportunity to challenge, search, and question the idea of art.

Selection Criteria

Visual arts nominees should have a strong desire to explore the various areas of visual arts. They possess superior drawing and creative skills, view every assignment as an opportunity, persevere through failure, and take artistic/creative risks to expand their skills in different media and styles of art. Students are also expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations set forth and interpreted by GHP.

Academic Record

- A strong academic record is preferred, but not required.
- Prior coursework in visual arts or art-related courses (e.g., drawing, painting, ceramics and sculpture, woodshop, photography) can be beneficial in preparation for the summer but is not required.

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page **25** of **28**

Skills

- Superior artistic abilities and adequate knowledge of visual arts vocabulary, basic concepts, and techniques (e.g., color, shape, texture, scale, and major arts of painting, sculpture, and architecture).
- Problem-solving skills and willingness to experiment and extend concepts beyond the basic level.

Interest Area

• Possess a sincere interest in visual arts demonstrated through relevant extracurricular activities and pursuits (e.g., sketchbook, web design, yearbook, photography, artist portfolio, independent study, illustrations or writing, and work and/or volunteer-related experiences).

Interview Expectations

- Semifinalists in visual arts will participate in a two-part selection process including (1) a portfolio interview where they present their art and (2) a multiple-choice visual arts exam.
- Successful semifinalists only present their strongest artistic work, present a variety of art pieces, and meet the recommended number of pieces.

The minimum portfolio requirements include:

- Three (3) drawings
- Two (2) color works
- One (1) three-dimensional work

In addition to the minimum, semifinalists may select up to seven additional pieces of their strongest work (maximum of 13 pieces total).

Sketchbooks are welcomed and each will be counted as one piece of artwork (optional).

A maximum of two digital pieces may be presented, and each will be counted as one piece of artwork. Digital pieces are not a substitute for drawing or color requirements (optional).

The selections should demonstrate the student's understanding of composition and principles of design.

WORLD LANGUAGES

Instructional Description

The GHP World Languages department provides an intensive daily immersion program where students will receive instruction, and research experiences in a targeted modern language (Chinese, French, German, or Spanish). Latin students will experience some daily usage in conversational Latin. Students will participate in supervised individual and group projects on a range of topics in the selected language. These topics may include investigating the culture, society, history, literature, current events, and/or political systems in regions of the world where the target language is used as the primary form of communication. Many classes participate in simulations, journaling, culturally related activities (e.g., Chinese tea ceremony), while also analyzing texts and films in the target language.

While all activities/study are conducted in the target modern language, speaking the language itself is **not** the only focus. At GHP, comprehensive fluency in the language is constantly reinforced through authentic, task-based activities that allow students opportunities to engage in meaningful and rich conversations. Potential nominees and their instructors should note that the goals of the world language program are to motivate students to become lifelong learners of the targeted language, demonstrate socio-cultural competence to allow them to communicate appropriately in various settings, and to gain additional knowledge of communities around the world where the language is spoken. Classes are suitable for students of all cultural backgrounds.

Only students who are both skilled in the target language and exhibit a desire/willingness to delve deeply into the target language's culture/history should apply for the world language program.

Selection Criteria World Language nominees should have an intense interest in the target language, be highly inquisitive, and enjoy learning about the cultural/historical aspects of the language. Students are also expected to, at all times, demonstrate integrity and respect for others during their participation in the program. This includes full participation in all aspects of the program and adherence to all rules, regulations, and expectations as set forth and interpreted by GHP.

Academic Record

- Strong academic record preferred and specific proficiency in the target language is required.
- At minimum, the student should be currently enrolled or have already taken the target language class at the second-year level.
- A strong candidate will possess an A average in the last three semesters of their target language class and be in good standing with the nominating educator and their World Language department (if applicable).
- The most successful World Languages candidates have typically completed or are enrolled in their respective language's advanced level courses (if available to them).

Course Descriptions and Selection Criteria Governor's Honors Program Governor's Office of Student Achievement (Revised September 2022) Page 27 of 28

Skills

- Specific knowledge of the culture and history of target language speaking people (e.g., ancient Roman culture, sports, major works of art, literature, etc.)
- Comprehension of most face-to-face speech in the standard target modern language dialect when spoken at a normal rate with occasional repetition.
- Ability to fully participate in casual conversation with a somewhat intelligible accent in their target language (except for Latin).
- Collaboration, critical thinking, problem-solving, creativity, and adaptability.
- Ability to describe an event or personal experience in the target language with proper pronunciation and are comfortable with impromptu conversation and reasoning about everyday life, culture, and historic events related to the target language (except for Latin).
- Proficiency in comprehending and/or translating authentic, unadapted Latin text (for Latin only).

Interest Area

- Displays sincere motivation to investigate the target language and explore historical and cultural aspects of countries where the target language is spoken.
- Presents evidence of study, reading or creative activities beyond the classroom.
- Demonstrates interest in the target language beyond the classroom through relevant extracurricular activities and pursuits (e.g., Junior Classical League, language or culture clubs, independent reading, independent study, academic competition team, summer programs, experiences with native speakers, and work and/or volunteer-related experiences).

Interview Expectations

- All language students will be assessed on their ability to read, write, and pronounce their target language, as well as their passion and knowledge of the target language speaking culture.
- World language semifinalists will participate in an individual interview and are evaluated on a variety of factors, inclusive of, but not limited to, interest, ability, and desire to learn.

Chinese, French, German, and Spanish

Chinese, French, German, and Spanish semifinalists will participate in an individual interview conducted in the target language and a writing sample in the targeted language. A portion of the interview may consist of oral language picture prompts or listening and reading comprehension exercises.

Latin

Latin semifinalists will participate in an individual interview conducted in English. A portion of the interview may consist of picture identification where students will be asked to identify and/or explain the cultural or historical significance of a set of pictures. The written examination will require students to read an authentic Latin passage and answer subjective reading comprehension questions in English.
