

April 22<sup>nd</sup>, 2022

Dear School Health Partner:

The Ronald McDonald Care Mobile<sup>®</sup>, is a mobile clinic of Children's Healthcare of Atlanta and Atlanta Ronald McDonald House Charities. Over the past several months, we have provided mobile immunization clinics for many schools in Atlanta. While we do not aim to replace your students primary care provider, we understand that many barriers have kept your students from their regular well checks this year. We hope to help bridge the gap so there are no lapses in care or school enrollment.

The Ronald McDonald Care Mobile<sup>®</sup> is happy to collaborate with you and your school to bring Primary Care services to your students and families. Your school has been selected to receive our services, and we hope you'll find this resource to be helpful as we work together to keep students healthy and in school. Our vision is to create stronger and healthier families by increasing access to primary care.

Our services include routine sick visits (sore throat, earache, etc.), sports physicals, 3300 form completion (Hearing and Vision Screening only), and more. Our nurse practitioner, nurse, medical assistant, and mobile outreach technician are happy to collaborate with you to meet the needs of your students, even if that means referring them to other services offered outside of the Care Mobile as needed. Our program coordinator is available to schedule clinic days and help provide promotional material for distribution among your students and families.

We thank you for all that you do for the children of Atlanta, and we look forward to working with you!

Sincerely,

Ronald McDonald Care Mobile Team<sup>®</sup>  
Children's Healthcare of Atlanta at Hughes Spalding
