Saw Cutting of Slab in Area H.

Cuts

Safety Sector

From the start of the project, workers on the APS Harper Archer project understand the importance of avoiding cuts.

- All workers understand that it is JE Dunn policy to wear gloves at all times on the jobsite.
- Wearing gloves is especially important when handling sharp objects to protect from any cuts that may occur.
- Everyone understands that they must report any cuts/injuries to JE Dunn to determine if there is a need for further medical attention.
