

TALBOTT RECOVERY

In network with most major insurance providers

Talbott Recovery is dedicated to providing compassionate, comprehensive treatment for co-occurring addiction and mental health disorders. Everything we do is aimed at helping people to find healing and develop the tools needed to maintain long-term recovery.

A Tradition of Evidence-Based Treatment

Talbott Recovery was born out of necessity. Founder, Dr. G. Douglas Talbott, experienced addiction and found that getting help as a licensed professional was a challenge. In 1989, he opened a facility specifically for licensed professionals, becoming a pioneering voice for the treatment of addiction and developing innovative methods to treat individuals with co-occurring disorders. Today, Talbott Recovery has expanded its programming to offer services for other licensed professions such as nurses, lawyers and pilots, as well as standard adult and young adult programs.

Treatment for the Whole Person

Talbott Recovery's treatment program is integrative – meaning it goes beyond detox and treating addiction by itself. Talbott Recovery dives into the mental health of each patient, taking into consideration life circumstances, family dynamics and getting to the root of the addiction. It offers family programs, and accountability partners to help navigate the recovery journey. Our goal is to help ensure that every patient receives unique, individualized treatment that suits their needs.

Atlanta, GA 30349

A Place to Rediscover Yourself

Talbott Recovery's campus is located on more than 120 acres of land featuring a 30-acre spring-fed lake allowing for the opportunity of outdoor therapies. This peaceful area provides an environment to help individuals establish a foundation for long-term recovery.

Indoors is a beautiful space flooded with natural light and used as a place to heal. Every area throughout the campus is intentional and used as a place to heal. Even the lecture hall hosts additional therapies such as music therapy and psychodrama.

- Psychoeducational groups, life skills training and education on how to use the 12 Steps
- Medically supervised detox

A Part of the FRN Family

Talbott Recovery is a part of Foundations Recovery Network (FRN), which combines evidence-based addiction treatment with therapies for emotional and mental health to effectively address co-occurring disorders.

A core principle of the FRN treatment model is preparing patients for long-term recovery. Talbott Recovery does this through relapse prevention education throughout treatment, an active alumni program, and when necessary, step-down opportunities through nearby outpatient locations.

Creating lifetime relationships for long-term recovery
