

# Atlanta Public Schools COVID-19 Weekly Case Report

This report summarizes COVID-19 cases and associated exposures reported to school and district staff from Saturday to Friday, including positives from surveillance testing, among students and staff who have been on-campus for school, work, or extracurriculars.

When APS health services staff are notified of a confirmed-positive COVID-19 case, they submit a form to the APS Health Services department. Case information supports reporting to state and local public health agencies as well as monitoring and tracking of cases and outbreaks within the district. When a positive case is reported amongst students or staff in a school or extra-curricular environment, COVID-19 protocols go into effect.

Blanks indicate that no data were submitted, while 0s indicate that the school confirmed no cases. A case is defined as an individual with a laboratory-confirmed COVID-19 positive from either antigen (rapid) or PCR (nasal swab) tests. Exposures are the close contacts of cases from school, work, and extracurricular settings. Exposures are aggregated from individual case reports and may not represent unique exposures (i.e. the same person exposed by multiple people may be counted twice).

## May 20, 2023 - May 26, 2023

# Atlanta Public Schools COVID-19 Weekly Case Report

This report summarizes COVID-19 cases and associated exposures reported to school and district staff from Saturday to Friday, including positives from surveillance testing, among students and staff who have been on-campus for school, work, or extracurriculars.

When APS health services staff are notified of a confirmed-positive COVID-19 case, they submit a form to the APS Health Services department. Case information supports reporting to state and local public health agencies as well as monitoring and tracking of cases and outbreaks within the district. When a positive case is reported amongst students or staff in a school or extra-curricular environment, COVID-19 protocols go into effect.

Blanks indicate that no data were submitted, while 0s indicate that the school confirmed no cases. A case is defined as an individual with a laboratory-confirmed COVID-19 positive from either antigen (rapid) or PCR (nasal swab) tests. Exposures are the close contacts of cases from school, work, and extracurricular settings. Exposures are aggregated from individual case reports and may not represent unique exposures (i.e. the same person exposed by multiple people may be counted twice).

## March 25, 2023 - March 31, 2023

# Atlanta Public Schools COVID-19 Weekly Case Report

This report summarizes COVID-19 cases and associated exposures reported to school and district staff from Saturday to Friday, including positives from surveillance testing, among students and staff who have been on-campus for school, work, or extracurriculars.

When APS health services staff are notified of a confirmed-positive COVID-19 case, they submit a form to the APS Health Services department. Case information supports reporting to state and local public health agencies as well as monitoring and tracking of cases and outbreaks within the district. When a positive case is reported amongst students or staff in a school or extra-curricular environment, COVID-19 protocols go into effect.

Blanks indicate that no data were submitted, while 0s indicate that the school confirmed no cases. A case is defined as an individual with a laboratory-confirmed COVID-19 positive from either antigen (rapid) or PCR (nasal swab) tests. Exposures are the close contacts of cases from school, work, and extracurricular settings. Exposures are aggregated from individual case reports and may not represent unique exposures (i.e. the same person exposed by multiple people may be counted twice).

Case information supports reporting to state and local public health agencies as well as monitoring and tracking of cases and outbreaks within the district. When a positive case is reported amongst students or staff in a school or extra-curricular environment, COVID-19 protocols go into effect.

Blanks indicate that no data were submitted, while 0s indicate that the school confirmed no cases. A case is defined as an individual with a laboratory-confirmed COVID-19 positive from either antigen (rapid) or PCR (nasal swab) tests. Exposures are the close contacts of cases from school, work, and extracurricular settings. Exposures are aggregated from individual case reports and may not represent unique exposures (i.e. the same person exposed by multiple people may be counted twice).

# Atlanta Public Schools COVID-19 Weekly Case Report

This report summarizes COVID-19 cases and associated exposures reported to school and district staff from Saturday to Friday, including positives from surveillance testing, among students and staff who have been on-campus for school, work, or extracurriculars.

When APS health services staff are notified of a confirmed-positive COVID-19 case, they submit a form to the APS Health Services department. Case information supports reporting to state and local public health agencies as well as monitoring and tracking of cases and outbreaks within the district. When a positive case is reported amongst students or staff in a school or extra-curricular environment, COVID-19 protocols go into effect.

Blanks indicate that no data were submitted, while 0s indicate that the school confirmed no cases. A case is defined as an individual with a laboratory-confirmed COVID-19 positive from either antigen (rapid) or PCR (nasal swab) tests. Exposures are the close contacts of cases from school, work, and extracurricular settings. Exposures are aggregated from individual case reports and may not represent unique exposures (i.e. the same person exposed by multiple people may be counted twice).

## October 15, 2022 - October 21, 2022

# Atlanta Public Schools COVID-19 Weekly Case Report

This report summarizes COVID-19 cases and associated exposures reported to school and district staff from Saturday to Friday, including positives from surveillance testing, among students and staff who have been on-campus for school, work, or extracurriculars.

When APS health services staff are notified of a confirmed-positive COVID-19 case, they submit a form to the APS Health Services department. Case information supports reporting to state and local public health agencies as well as monitoring and tracking of cases and outbreaks within the district. When a positive case is reported amongst students or staff in a school or extra-curricular environment, COVID-19 protocols go into effect.

Blanks indicate that no data were submitted, while 0s indicate that the school confirmed no cases. A case is defined as an individual with a laboratory-confirmed COVID-19 positive from either antigen (rapid) or PCR (nasal swab) tests. Exposures are the close contacts of cases from school, work, and extracurricular settings. Exposures are aggregated from individual case reports and may not represent unique exposures (i.e. the same person exposed by multiple people may be counted twice).
